Program Summary

1. Overview

The Neighborhood Stabilization Program – 2 (NSP2) is one of the initiatives of the American Recovery and Reinvestment Act of 2009 (ARRA). The program was modeled after the Neighborhood Stabilization Program – 1 (NSP1) created under the Housing and Economic Recovery Act of 2008 (HERA). Under NSP - 1, the City of Long Beach was allocated \$5.07 million funds from U.S. Department of Housing and Urban Development (HUD) in order to purchase foreclosed or abandoned homes and to rehabilitate, resell, or redevelop these homes, stabilize neighborhoods, and stem the decline of house values of neighboring homes. The City Council approved the plan for the use of NSP1 funds at their November 18, 2008 City Council meeting. Soon afterward, the Department of Community Development began implementing the program.

Properties in foreclosure continue to be a problem across the country, prompting the U.S. Congress to add the Neighborhood Stabilization Program – 2 (NSP2) to the American Recovery and Reinvestment Act of 2009. NSP2 is a competitive grant program rather than an entitlement program. NSP2 regulations are virtually identical to NSP1 with few exceptions.

2. Application Process

The City of Long Beach Department of Community Development, as the lead, and its partner, Habitat for Humanity Greater Los Angeles (Habitat), a non-profit full service developer, herein collaborate with and submit this joint application for NSP2 funds. Once selected, the City and Habitat are ready to meet HUD's published NSP requirements, as described in Appendix 1 of its notice.

The central foundation of this joint application has overarching goals: creating affordability and increasing homeownership in highly affected targeted neighborhoods, mitigate negative effects of foreclosure like blight and decline of housing values, and revitalize and reconnect targeted neighborhoods to higher level and sustainable economy and housing market.

3. Proposed Use of NSP- Funds

The City and Habitat will use NSP2 funds in the areas of greatest need, including those with the greatest percentage of home foreclosures, with the highest percentage of homes financed by sub-prime mortgage loans, and those areas identified by the City, through its thorough and comprehensive housing and economic data analysis, as areas likely to face a significant rise in the rate of home foreclosure.

The City NSP2 proposal is focused on returning foreclosed properties back into the hands of qualified owners who will restore these properties and in so doing increase the livability of area neighborhoods. While implementing NSP1, the City has

observed that there is a very active speculative industry in which investors are seeking to acquire and hold REO properties until the market improves. In areas of high-foreclosure concentrations, excessive speculative purchases will greatly prolong the cycle of disinvestment for years to come as these investors hold properties, make minimum or no investment, and cause further neighborhood decline. This is a looming problem that must be addressed innovatively with the proposed NSP2 programs. It is the City's goal to intervene and prevent neighborhood destabilization by aggressively competing in the REO market. We will seek to divert a significant share of resold REOs to first time homeowners, who will serve to stabilize their communities. The City will be implementing this strategy in several ways, including direct acquisition and disposition of REOs by Habitat and through direct affordable financial assistance to prospective homebuyers to acquire and/or rehabilitate the properties. Through this strategy, the City will help stabilize high-foreclosure areas, arrest the decline housing values, and reconnecting targeted neighborhoods with the economy, housing market, and social networks of the community and metropolitan area as whole.

4. Program Design

The City and Habitat will establish NSP2 funded programs that fully comply with the eligibility requirement.

The proposed NSP2 funded programs will be fully implemented by the Community Development Department and Habitat according to HERA, Community Development Block Grant (CDBG) and all other applicable federal rules and regulations. In addition, proposed activities will target eligible City residents that are: 1) in the income bracket of 51 to 120 percent area median income and 2) 25 percent of the funds will also fully be "deep targeted " to eligible residents at or below 50 percent of the area median income.

NSP2 funds will be used by the City and Habitat to undertake the following two primary activities and administration:

- Establish financing mechanisms to purchase and redevelop foreclosed upon homes and residential properties, including such mechanism as soft-second, loan loss reserve, and shared-equity loans for low- and moderate-income homebuyers.
 - The City will provide silent second mortgage assistance loans to low- and moderate-income first-time homebuyers who purchase a qualified single-family or condominium home in an eligible area.
- Purchase and rehabilitate homes and residential properties that have been abandoned or foreclosed upon, in order to sell, rent, or redevelop such homes and properties.
 - Habitat will rehabilitate foreclosed and REO properties into affordable homes for purchases by low and very-low income families.

5. Requested Amount

| Strategy | Amount Allocated | Estimated Housing Units |
|--|-------------------------|--------------------------------|
| Establish financing mechanisms for purchase and redevelopment of foreclosed homes - 65% | \$14,662,487 | 86 |
| Purchase and rehabilitate homes that have been foreclosed upon - 25% (for 50% area AMI buyer) | \$5,562,480 | 25 |
| Administration - 10% | \$2,224,998 | 0 |
| TOTAL | \$22,249,980 | 111 |

Narrative Statements

1. Factor 1 – Market Analysis Conditions- Long Beach Neighborhood Stabilization Program 2 Target Areas

a. Target Geography - North Long Beach - (see Appendix 1 and 2 for a list of Census Tracts)

Target Geography:

We have studied and selected 44 of the most distressed census tracts within the City based on NSP 2 scores (average of 18 overall), foreclosure activity, lending trends, default risks, housing and other neighborhood socio-economic conditions. These census tracts are located within four major areas referred to as West Long Beach, Central Long Beach, East Long Beach, and North Long Beach neighborhoods. Although the conditions vary, all areas exhibit common elements of distress and an urgent need to address the foreclosure crisis. In addition, the City has long monitored the citywide housing conditions and affordability under NSP 1, other existing housing programs, community redevelopment activities, and via the Vacant Building Ordinance. We are therefore confident that the requested NSP 2 funds combined with our existing affordable housing resources will best serve to stabilize the target tracts selected for this program.

b. Market Conditions and Demand Factors

(1).Reasonable projection of the extent to which the markets (in target geography are likely to absorb abandoned and foreclosed properties through increased housing demand during the next three years if funding is not received.

Market Absorption Rates:

| Actual Total Sales 12-mos (May 08-April 09) | Projected REO's over 12 months | Actual REO Foreclosure Sales 12-mos (May 08-April 09) | Unsold overhang over 12 months | Unsold overhang over next 3 Years | Pre-foreclosures as % of all SFD/condos |
|---|--------------------------------|---|--------------------------------|-----------------------------------|---|
| 2,058 | 995 | 855 | 140 | 420 | 3.2% |

Sources: www.realestateconomics.com / www.foreclosureradar.com and City Projections

During the first three (3) months of 2009, there were 327 NOD's (preforeclosures) recorded on residential properties located within target area tracts. Projecting these preforeclosures over 12 months totals 1,326. Since a percentage of these preforeclosures will be redeemed by a loan modification or workout, it is estimated by the City that 75% or a total of 995 will become foreclosures.

There were a total 2,058 sales transactions during the 12-month period May 2008-April 2009 within the NSP 2 target area census tracts. These sales included private re-sales, new construction, and REO foreclosures sales. Of the

total sales, 855 or 46% were foreclosure sales over this 12-month period. This percentage translates into a monthly rate of 12 un-absorbed properties or 140 per year. Projecting this rate over three years brings this overhang to 420 un-absorbed properties. This figure, however, does not include existing unsold inventory at the start of this analysis period. Although the average time on the market is 67 days, the average maximum time is 661 days for certain properties (source: www.realestateaol.com). This data shows that the market is not projected to absorb all abandoned or foreclosed-upon properties via the normal market process without NSP2 funds.

Employment:

The current citywide unemployment rate is 12.5%. Although it is projected that a small increase (5%) in citywide jobs will occur (2009-2013), even the highest paid group (management occupations) at \$72,238 (source: www.economicmodeling.com) would be cost burdened for an average target area priced-home. Employment growth will not serve to increase absorption of foreclosed-upon properties.

Population Growth:

Based on data from www.GeoLytics.com, the combined projected population for the target tracts is a negative -2.4%. Therefore, population growth will not help increase absorption of unsold (unabsorbed) homes over the next 3 to 5 years.

(2).Extent to which over-building of housing units, over-valuation of housing, or loss of employment is a critical factor, or the most critical factor, causing abandonment and foreclosure in the target geography.

Overbuilding:

| CATEGORY | Total Number Of Home Sales May 06 to April 09 | | | | | |
|--------------------------------------|---|--------------|------------------------|--------------|------------------------|-------------|
| | May 2008 to April 2009 | | May 2007 to April 2008 | | May 2006 to April 2007 | |
| | Number | % | Number | % | Number | % |
| <i>OVERALL</i> | 4,788 | 100% | 3,330 | 100% | 4,863 | 100% |
| <i>% Change from Prev. Period</i> | | 43.8% | | -31.5% | | |
| Resale (Private Market) | 2,235 | 46.7% | 1,915 | 57.5% | 3,718 | 76.5% |
| New (Builder-to-Owner) | 153 | 3.2% | 218 | 6.55% | 557 | 11.5% |
| Foreclosures (Bank Take Back) | 1,144 | 23.9% | 745 | 22.4% | 329 | 6.8% |
| Foreclosure Sales (REO Sales) | 1,256 | 26.2% | 452 | 13.6% | 259 | 5.3% |

Source: www.realestateeconomics.com

The table above and the chart below show that new construction (Builder-to-Owner) sales only accounted for 3.2% of the total activity during the last 12 months. These new 153 units only represent a 0.4% increase in the total housing stock. Two years prior it was at 11.5%, representing a 1.4% increase in the housing stock. This data shows that overbuilding was not the cause of the foreclosure crisis.

Overvaluation:

| Period | No. Preforeclosures (NOD's) Filed | Estimated Property Value | Estimated Loan Balance | Equity (value minus loan) | % Value to Loan |
|--------------------|-----------------------------------|--------------------------|------------------------|---------------------------|-----------------|
| Jan 09 to March 09 | 327 | \$171,894,888 | \$290,690,544 | (\$118,795,656) | 169% |
| Average | | \$525,672 | \$888,962 | (\$363,289) | 169% |

Source: www.foreclosureradar.com

During the 3-month period, January 2009 to March 2009, there were 327 NOD's or preforeclosures recorded for the subject census tracts. Adding the total property value as estimated by the data provider equals \$172 million, however, the combined loan balance totals \$291 million - resulting in a total negative equity of \$119 million. Given the median income for these areas, it is clear that predatory sub-prime lending encouraged homeowners to refinance or take out second loans based on these inflated values. This data confirms the extent of over-valuation, a major cause of foreclosures and as confirmed by HUD NSP risk scores.

Lenders and Overvaluation:

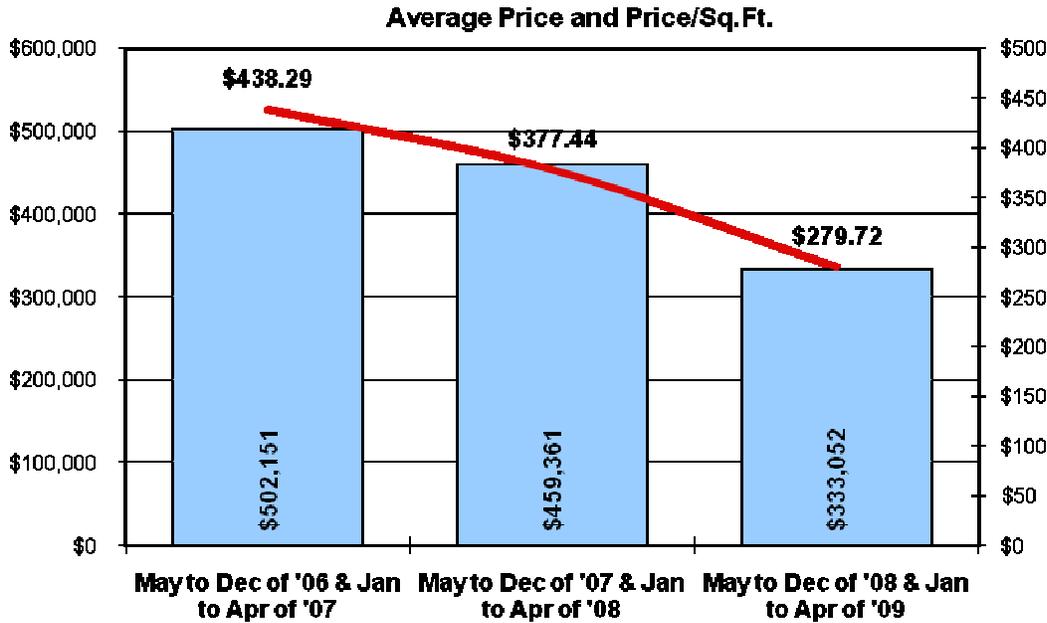

There were 4,592 transactions during the 12-month period May 2008 to April 2009 comprised of (owner to lender), lender REO sales, private (owner to owner), and private new construction sales. A review of the sellers shows an array of sub-prime lenders. These include the now-defunct Countrywide Mortgage, now defunct Indy Mac Bank, JP Morgan, and Merrill Lynch (recipients of TARP bailout funds). All of which have had disastrous sub-prime lending records. The identity of these lenders and extent of high-leverage loans further confirm overvaluation as a critical cause of the foreclosure crisis in the selected tracts.

Overvaluation and Sub-Prime Lending:

The following table shows that the average sales price (SFD/condos) for the target zip code areas has declined from \$502,151 to \$333,052 (or 28%) over the 3-year period. In addition, current REO foreclosure sales prices average about 38% lower than non-foreclosure private market sales. The data shows the extent of sub-prime lending based on overvaluation. The averaged-priced home in 2006 and even today requires an average of 55% of the area median income. Without sub-prime adjustable loans, these sales would not have occurred to households that could not afford them.

| CATEGORY | Average Sold Price May 06-April 09 | | |
|-----------------------------------|------------------------------------|-----------|-----------|
| | Current | One Yr. | Two Yrs. |
| | Period | Ago | Ago |
| <i>OVERALL</i> | \$333,052 | \$459,361 | \$502,151 |
| <i>% Change from Prev. Period</i> | -27.5% | -8.5% | |
| Resale (Private Market) | \$388,235 | \$498,639 | \$505,680 |
| New (Builder-to-Owner) | \$452,303 | \$501,101 | \$502,313 |
| Foreclosure (Bank Take Back) | \$283,876 | \$385,956 | \$430,980 |
| Foreclosure Sale (REO Sales) | \$280,926 | \$397,628 | \$519,640 |

| 90807 | 1,103 | \$314,722 | 9.9% | 70% | 29% | 7% | 96% |
| 90802 | 948 | \$403,745 | 8.5% | 53% | 22% | 9% | 84% |
| 90806 | 715 | \$306,092 | 6.4% | 67% | 22% | 9% | 89% |
| 90810 | 673 | \$259,690 | 6.0% | 62% | 21% | 16% | 94% |
| 90804 | 652 | \$322,848 | 5.8% | 58% | 20% | 9% | 81% |
| 90813 | 548 | \$319,590 | 4.9% | 64% | 24% | 9% | 74% |
| 90814 | 544 | \$327,634 | 4.9% | 70% | 30% | 4% | 95% |
| Totals | 11,174 | \$334,766 | 100.0% | 69% | 27% | 8% | 93% |

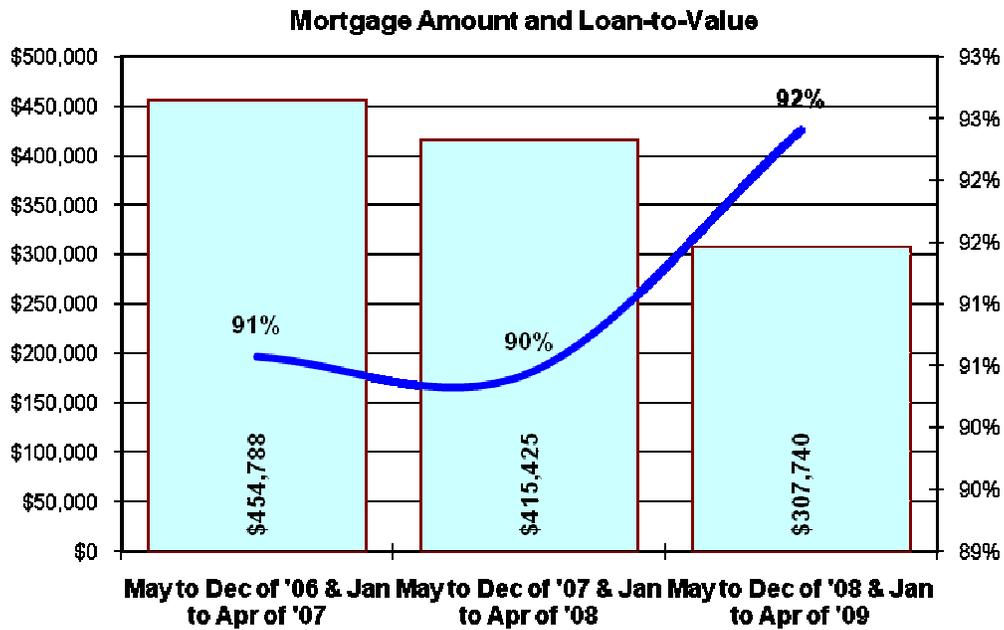

Source: www.dataquick.com

During the 12-month period February 2008 to February 2009, there were 11,174 loans transacted in the NSP zip code areas of which ninety-three (93%) were for SFD/Condos. It is significant to note that an average of 69% were non-purchase refinancing loans and 27% were adjustable rate, generally considered sub-prime by HUD. This means that when these loans adjust to market interest rates – borrowers face the risk of unaffordable payment increases, defaults, and

potential loss due to foreclosure. In addition, an average of 8% overall contained a LTV of zero to 5%- also considered high leverage loans. Again, overvaluation coupled with sub-prime lending were the most critical factors behind the foreclosure problem.

High-Leverage Loan to Value Factors:

The chart below shows that the average mortgage amount has declined 26% from \$454,768 to \$307,740 over the 3-year study period. In addition, the average down payment has remained low, averaging about 8% to 9% of the purchase price. A low down payment results in higher loan to value and creates more risk that the limited equity will be eliminated as foreclosures sales increase and depress overall market values. With evaporated or negative equity, adjustable rate and other high-priced loans cannot be refinanced into more affordable low interest rates. This condition perpetuates higher risk of foreclosure and further neighborhood price declines. Again, high-leverage based on overvaluation coupled with sub-prime lending were the most critical factors behind the foreclosure problem.

Source: www.realestateconomics.com

(3). The income characteristics of target geography households and information on housing cost burden for households at the 50 percent, 80 percent, and 120 percent of area median income levels.

Income and Housing Cost Burden (In Total and by Neighborhood):

The average median household income for all NSP target area tracts is \$39,930 based on June 2009 updates of 2000 Census data. This income level is about 64% of the Los Angeles County AMI (\$62,100 for family of 4). Approximately 42% of the entire target area households have incomes at or below 50% of AMI

(less than \$30,000), 22% are at (51% to 80% of the AMI), and about 16% at (81% to 120% of the AMI (www.GeoLytics.com). A combined eighty-one (81%) percent of all households within the target tracts are at 120% or below the AMI. The following table delineates income and housing cost burden for each neighborhood by census tract.

Central Long Beach Neighborhoods (Income and Cost Burden):

| Census Tract | # of 1-Unit Attached/Detached | Ann. Median HH Income | Ann. Mortgage (96% LTV) (PITI) for Avg. Home | Cost Burden of Homeownership | Avg. 3-BR Rental by Zip Code 2009 | Percent Median Inc Used for Rent |
|--------------|-------------------------------|-----------------------|--|------------------------------|-----------------------------------|----------------------------------|
| 576300 | 431 | \$22,260 | \$23,196 | 104.2% | \$18,000 | 80.9% |
| 573202 | 852 | \$26,805 | \$21,870 | 81.6% | \$22,680 | 84.6% |
| 576401 | 309 | \$18,967 | \$15,114 | 79.7% | \$18,000 | 94.9% |

| 572100 | 301 | \$69,768 | \$26,477 | 37.9% | \$22,200 | 31.8% |
| Totals | 9,574 | | | | | |
| Averages | | \$35,918 | \$20,317 | 62.3% | \$21,939 | 70.6% |

Source: www.realestateconomics.com / www.GeoLytics.com / www.zillow.com

For all census tracts located in the Central Long Beach neighborhoods, the annual housing cost (housing cost includes principal, interest, taxes and insurance – PITI) for an average-priced home is \$20,317 and the average rent for a 3-bedroom unit is \$21,939. On average, 62% of all census tracts in these neighborhoods are cost burdened with mortgages and 71% with rent cost - defined as spending more than 30% of monthly income on housing for an average-priced dwelling unit.

East Long Beach Neighborhoods (Income and Cost Burden):

| Census Tract | Total 1-Unit Attached/Detached | Ann. Median HH Income | Ann Mort (96% LTV) (PITI) for Avg. Home | Cost Burden of Homeownership | Avg. 3-BR Rental by Zip Code 2009 | Percent Median Inc Used for Rent |
|--------------|--------------------------------|-----------------------|---|------------------------------|-----------------------------------|----------------------------------|

Source: www.realestateconomics.com / www.GeoLytics.com / www.zilpy.com

For all census tracts located in the North Long Beach neighborhoods, the annual housing cost for an average-priced home is \$19,265 (PITI) and the average rent for a 3-bedroom unit is \$22,553. On average, 53% of all census tracts in these neighborhoods are cost burdened with mortgages and 64% with rent cost - defined as spending more than 30% of monthly income on housing for an average-priced dwelling unit.

West Long Beach Neighborhoods (Income and Cost Burden):

| Census Tract | Total 1-Unit Attached/Detached | Ann. Median HH Income | Ann Mort (96% LTV) (PITI) for Avg. Home | Cost Burden of Homeownership | Avg. 3-BR Rental by Zip Code 2009 | Percent Median Inc Used for Rent |
|--------------|--------------------------------|------------------------------|--|-------------------------------------|-----------------------------------|----------------------------------|
| 572302 | 726 | \$39,997 | \$25,058 | 62.6% | \$21,600 | 54.0% |

Source: www.realestateeconomics.com / www.GeoLytics.com / www.zilpy.com

For all census tracts located in the West Long Beach neighborhoods, the annual housing cost for an average-priced home is \$18,695 (PITI) and the average rent for a 3-bedroom unit is \$22,635. On average, 45% of all census tracts in these neighborhoods are cost burdened with mortgages and 60% with rent cost - defined as spending more than 30% of monthly income on housing for an average-priced dwelling unit.

(4).Relevant social, governmental, educational, or economic factors contributing to local market conditions and to neighborhood decline or instability within the target geography.

Social and educational factors contributing to neighborhood instability include; an average total minority population of 79% with 49% that speak either an Asian language or Spanish at home. Approximately 57% of the population 25+ years has a high school education or less. About 21% of the households have incomes below the poverty level based on June 2009 estimated Census data from www.GeoLytics.com. These social, cultural, language, and educational conditions can make this population segment more vulnerable to predatory- sub-prime lending practices that helped lead to defaults and foreclosures.

Long Beach citywide unemployment stands at 12.5% as of April 2009 (based on State LIM1 EDD data as compared with 5.6% two years prior). Unemployment means less income into a typical household- and less ability to afford housing costs. Overall jobs in the City of Long Beach are projected to remain relatively stable, except for the manufacturing sector, which is projected to decline by 18% between 2009 to 2012- based on data from www.economicmodeling.com . About 19% of City residents work in production (manufacturing) and transportation related occupations and will be negatively impacted. Although the NSP program cannot directly provide job assistance, it can assist economically by reducing the housing cost burden.

On average residents must pay 55% of median HH income for an average priced home and 56% of income for an average 3-bedroom rental. This income burden means that the average target area household cannot afford an average priced property REO, yet they are selling. We can therefore conclude that private investors (absentee landlords) are purchasing these properties to be used as rentals and thereby not increasing homeownership. This condition is further confirmed by the fact that over half of the 44 census tracts contain from 60% to 100% attached and detached 1-unit homes, yet only 48% of the area housing stock is owner-occupied. Unlike homeownership, rentals do not contribute to neighborhood stability. In addition, there is generally a greater rate of deferred maintenance with rentals – which over time affects overall neighborhood stability. More startling is the fact that the average 3-bedroom rents can, all else being equal, support the mortgage payment of an average REO property. But for a down payment and affordable loan terms, these renters could ideally become homeowners.

The average age of the target housing stock is 50 years old with certain tracts containing homes that average 70-years plus. Older homes require more maintenance and capital replacements that further contribute to the housing cost burden and to neighborhood destabilization.

(5).NSP2 activity categories are most likely to stabilize the target geography based on the information above.

Market Condition (1):

Absorption Rates and Foreclosure Volume

We will intervene in the foreclosure absorption overhang market by increasing buyers to help absorb the continuing influx of REO properties. We will also reduce the number of foreclosure sales as a percent of all future sales by addressing the root cause -- unaffordable loans and over-priced homes. We will accomplish this by making direct REO purchases from lenders (via Habitat activities) and by providing financial assistance under our Second Mortgage Assistance (SMAP) Program to qualified buyers who will themselves make such purchases. We will further also attack the foreclosure situation by means of comprehensive neighborhood monitoring of the real estate market and other economic conditions. Current knowledge will help borrowers, residents, NSP program staff, community, and political leaders understand conditions and make the most informed decisions with regards to attacking the foreclosure crisis.

Sub-Prime Lending

Unlike other areas in the nation, these neighborhoods are not experiencing foreclosure destabilization due to overbuilding or high numbers of vacancies. The data shows that a primary culprit was sub-prime lending practices. We will address this issue by offering acquisition loans based on current Fair Market Value (FMV) and then subsidize the loan terms to levels that are affordable by persons below 120% of AMI. We will also provide deep discounts (via Habitat activities) to homebuyers at or below 50% of the AMI. We will further address

sub-prime lending by monitoring these predatory lenders, referring buyers to approved lenders, providing solid homeownership counseling, providing financial literacy, and making referrals to other supportive services such as legal aid. We will further combat sub-prime lending by enhancing homeownership knowledge by utilizing the renowned careful homebuyer screening process and counseling of Habitat for Humanity of Greater Los Angeles (Habitat).

Market Condition (2):

Overvaluation

The average selling price difference between an REO foreclosure and a private sale is about 38% lower (\$388,235 versus \$280,962) within the target tracts. We will address the issue of past overvaluation (making loan on inflated prices) by acquiring and re-selling homes based on the current appraised FMV and by providing subsidies with loan repayment terms that do not exceed 30% of the household income. In calculating the LTB ratio, we will liberally take into consideration family size, all debt, and all required consumer living expenses in structuring an affordable payment. We will continue to use our widely successful SMAP program, which includes interest-free second mortgages with no monthly payments and possible equity sharing. NSP assisted homes should therefore sell in the future at the normal private market prices (now 38% higher) and thereby achieve NSP long-term program goals of increasing median market values in the target neighborhoods.

Market Condition (3):

Housing Cost Burden

We will address the housing cost burden by providing loans and reselling homes that are priced at affordable levels. We will bring the housing cost to levels that do not exceed 30% of household income by structuring affordable loan terms and deep subsidies. Loans will be provided to households at or below 120% AMI who represent about 81% of the entire target area housing market. Our partner Habitat will meet deep targeting goals by addressing the homeownership needs of households at 50% or less of the AMI (42% of total market). In addition, we will strengthen long-term neighborhood stability by requiring the longest feasible continued affordability loan terms. We will also reduce the cost burden by reducing future homeownership operating/maintenance expenses by requiring high quality rehabilitation before occupancy. We will also lower costs by requiring and subsidizing green and energy saving improvements as a component of rehabilitation.

Market Condition (4):

Lack of Homeownership

We will address the issue of low homeownership rates by acquiring REO's and reselling these to homebuyers and by converting renters to first-time homeowners. We make this possible by continuing our over-subscribed SMAP program, identifying qualified local renters, providing first-time homeowner

education, providing affordable loan terms, and other related supportive services. By expanding homeownership and converting renters to owners, we will further serve to stabilize the target neighborhoods and reduce the negative impacts of excessive rentals and absentee landlords.

Housing Stock Condition

We will help arrest blight and decline of the aging foreclosed-upon housing stock (average 50 to 70 plus years) by requiring and subsidizing high quality rehabilitation, providing Green standards, and as lot sizes permits, making needed room additions and expansion. The proposed high-quality rehabilitation program will result in enhancements and extend life of the existing housing stock while lowering ownership costs. Lower costs will be realized by means of affordable loans terms, lower maintenance costs resulting from rehabilitation, lower energy costs (Green and other sustainable building standards). All these actions will serve to stabilize and revitalize the target neighborhoods.

Other Economic Factors

We will help address the economic problems by reducing the percentage of monthly income of program participants dedicated to housing expenses. This assistance will generate more disposable income for consumer related needs (savings, education, health care, etc.). We will also increase household wealth over time by facilitating growth in home equity by means of mortgage pay down, stabilizing the market and reducing foreclosures, which help contribute to stable normal property value increases over time.

In addition, considerable NSP 2 rehabilitation construction, lending, brokerage, and other program spending will generate new direct and indirect fiscal and economic benefits including employment opportunities – with a percentage for available to qualified target area residents.

Reconnect Neighborhoods –Cultural and Language Issues

We will address the cultural and language issues by providing lending and information programs that are culturally and language sensitive. We will also reconnect neighborhoods with housing, local economy and social networks by the use of information technology systems (web-based media, social networking systems). These will include, NSP2 requires grantees to obtain information which to make property purchases, identify buyers, target income groups, track results, and the like. We will utilize such data and information systems to provide supportive service referrals, extensive program marketing, useful real estate market information to the community, identify bad lending practices, show progress and much more.

We will further reconnect and stabilize our neighborhoods by integrating our NSP2 programs in with other housing programs, local and regional plans, and policies (energy conservation, safety, code enforcement, crime, jobs, etc.), further discussed in the application.

2. Factor 2 – Demonstrated Organizational Capacity and Relevant Organizational Staff

a. Past Experience of the Applicant

The City is committed to the preservation and expansion of its affordable housing supply, and revitalization and stabilization of neighborhoods. The City accomplishes most of its affordable housing goals through The Long Beach Housing Development Company (LBHDC), a non-profit, public benefit corporation with the City as its sole member. It is governed by an eleven-member citizen Board of Directors appointed by the Mayor and confirmed by the City Council. Through a contract between the City and the LBHDC, the Housing Services Bureau, City Attorney's Office, City Auditor, and Financial Management Department provide staff to support the LBHDC.

The City has a long history of furthering its neighborhood stabilization and affordable housing efforts through a variety of programs including downpayment and silent second mortgage assistance loans to low- and moderate-income first-time homebuyers, development of new rental and for sale affordable housing, rehabilitation of multi- and single-family residential housing, and acquisition/rehabilitation of single-family homes for resale to qualified first-time homebuyers.

The City has assisted in the creation or preservation of over 2,000 existing affordable housing units, and an additional 600 units are in various stages of development or rehabilitation, both rental and ownership. Since 1992, the City has assisted in excess of 900 very low-, low, and moderate-income homebuyer households with downpayment and mortgage assistance for the purchase of their first home. Specifically, in the past 24 months the City and the LBHDC have funded second mortgage assistance loans for 113 very low-, low-, and moderate-income first-time homebuyers, and provided financial assistance to nonprofit developers for the construction of 185 new rental units, and the rehabilitation of 346 rental units for very low- and low-income households

Our consortium partner, Habitat for Humanity of Greater Los Angeles (Habitat), is a full service developer with 20 years experience in renovating and building new homes for sale to low- and very low-income families. In the past two years Habitat has completed the construction and rehabilitation of 116 for sale units. To date they have built or rehabilitated over 300 homes in Los Angeles County.

Current Neighborhood Stabilization Efforts:

Shared-Equity Loans for Low-and Moderate-Income Homebuyers

In October 2008, the City of Long Beach, in cooperation with the LBHDC, dedicated \$12 million dollars of federal HOME/ ADDI, state CalHOME, and local 20% tax increment set-aside funds to a Second Mortgage Assistance Program (SMAP) which provides up to \$275,000 in silent second mortgage assistance loans to low- and moderate-income first-time homebuyers who purchase a qualified single-family

or condominium home in a City of Long Beach Redevelopment Project Area. The SMAP was designed to stimulate reinvestment, revitalize, and prevent the deterioration of neighborhoods caused by the falling real estate market.

Through the SMAP, first-time homebuyers may apply for a silent second mortgage assistance loan in an amount equal to the purchase price minus the sum of the borrowers mandatory downpayment and their first Trust Deed mortgage loan. First TD loans must be at least 30% of the purchase price and the borrowers monthly housing costs must be at least 28% of their income. The second mortgage loans run concurrent with the first TD loans and are due and payable after 30 years or upon sale of the property, whichever ever occurs first. The second loan does not accrue interest and no monthly payments are required. However, should the borrower sell the property prior to 30 years contingent, deferred interest in the form of equity share shall be paid along with the principal balance of the loan. The equity share percentage is calculated as the sum of the second mortgage assistance loan divided by the purchase price, and is applied to the net proceeds on the sale of the property. The net proceeds will be calculated as the sales price (or appraised value) minus the original purchase, and any capital improvements. A portion of the equity share percentage will be forgiven for each year that the borrower maintains the property as their principal residence. After 30 years the equity share percentage is fully forgiven and only the principal amount of the loan is due.

The SMAP was so popular that the City stopped accepting new applications in January 2009. As of June 2009, 198 SMAP applications have been received. 119 of these applicants have been verified as income-eligible and approved to participate in the SMAP. Of the 119 applicants, 61 have opened escrows on eligible properties. 34 homes have closed escrow and the remaining 27 escrows are in progress and scheduled to close by mid August. Due to limited resources, the City is unable to assist all 119 approved applicants with second mortgage assistance. However, should the City receive NSP2 funding, the remaining 47 approved applicants will be invited to participate in NSP2.

To ensure the viability and success of the SMAP, the City partnered with mortgage lenders to market the program to potential buyers and the real estate community, pre-qualify applicants, and secure first TD mortgage loans for buyers. To prepare for this partnership, during the summer of 2008, the City invited local realtors and lenders to attend informational meetings about the upcoming program. Interested lenders were then invited to respond to a Request For Qualifications. The lenders with the strongest experience with first-time homebuyers programs, mortgage financing, and marketing capabilities were invited to participate as select lenders for the SMAP. Lenders were also given special consideration for providing multi-lingual services. 19 select lenders confirmed their participation in the SMAP and executed a Lender Participation Agreement (LPA).

Additionally, each participant is required to complete a HUD-Certified 8-hour first-time homebuyer education seminar prior to receiving mortgage or downpayment assistance. For the past several years, the LBHDC has partnered with Los Angeles Neighborhood Housing Services (LANHS) to provide monthly first-time homebuyer

(FTHB) seminars in English, quarterly FTHB seminars in Spanish, and quarterly post-homeownership seminars throughout various locations in Long Beach.

In addition to our lenders' marketing efforts, the LBHDC markets the SMAP through its website at www.lbhdc.org as well as via outreach efforts at community events and our locally televised monthly "Inside Long Beach" program (<http://www.lbhdc.org/video.html>). Interested parties may also receive information from staff via phone, mail, or on a walk-in basis. Staff is available to assist clients in the following languages: English, Spanish, Khmer, and Vietnamese.

To ensure that the SMAP is administered effectively and within the required guidelines, the City and the LBHDC are involved in each aspect of the process. Staff reviews all applications from lenders, confirms applicant eligibility, provides SMAP participation status letters to lenders and applicants, coordinates property inspections through the City's Code Enforcement and Rehabilitation Divisions, and confirms that all SMAP requirements have been met by the borrower and the lender prior to funding the mortgage assistance loan.

Acquisition/Rehabilitation and Resale of Residential Properties

With the use of NSP1 funds the Rehabilitation Division of the Neighborhood Services Bureau of the City of Long Beach has begun the acquisition and rehabilitation of abandoned and foreclosed properties. In accordance with the City's Action Plan, in the first round, at least 8 single-family homes and 1 multi-family residential building will be acquired and rehabilitated. Upon completion of the single-family acquisitions and rehabilitation, these properties will be sold to eligible applicants from the LBHDC's SMAP who earn less 120% of area median income (AMI). The multi-family property will be transferred to a non-profit for management as a rental project for households earning less than 50% of AMI.

Through this process, City staff will locate foreclosed properties, negotiate the sales price with the bank, and administer the purchase process through its in house real estate professionals. Upon the close of escrow the City's Rehabilitation Division staff assess the property condition, perform a rehabilitation work write-up, as required, and request bids from local contractors to complete rehabilitation work. After completion of any required rehabilitation, the LBHDC will match the properties with applicants from their SMAP waiting list.

To date, the City has placed offers on 10 single-family properties. 9 offers have been accepted and 7 have closed escrow. The Rehabilitation process has begun on the 3 properties that have closed escrow. Efforts are underway to identify a vacant, foreclosed multi-family residential building.

With NSP2 funding, the City, in partnership with Habitat, will increase affordable homeownership opportunities to very low-income households. Habitat will purchase, rehabilitate and sell a minimum of 25 homes to households earning less than 50% of AMI. In addition to their 20 years of experience in renovating and building new homes for sale to low-income families, Habitat is also a mortgage lender that

specializes in providing interest-free financing to very low-income families who do not qualify for market rate loans

Habitat provides a complete rehabilitation on each home, including major appliances and critical components. They have extensive experience and a long standing dedication to developing LEED certified homes, installing solar panels, and including sustainable materials in each of their builds.

Habitat's revitalization model is comprehensive and includes every aspect of the acquisition, rehabilitation and resale process. They will identify and acquire properties, perform assessments, develop budgets, select buyers, perform rehabilitation work (buyers' will contribute of sweat equity) and sell the unit to the buyer with a zero interest loan.

In the past two years Habitat has completed the construction and rehabilitation of 116 for sale units. To date, they have built or rehabilitated over 300 homes in Los Angeles County.

Residential Rehabilitation

Additionally, the City administers rehabilitation loan programs through the Rehabilitation Division of the Neighborhood Services Bureau.

In the past 24 months, the City has provided rehabilitation loans totaling \$4,074,877.44 to 102 properties (161 units). This includes 82 single-family and 20 multi-family properties.

In 2008, the City's Rehabilitation Division completed a substantial rehabilitation project with DECRO Long Beach, a Community Housing Development Organization (CHDO). With the City's investment of \$11 million of federal HOME funds, 320 rental units in 12 scattered sites were substantially rehabilitated and made affordable to households earning less than 60% of AMI for a 55-year period.

As a result of the nationwide housing crisis, which has caused massive foreclosures of residential real estate in Southern California, the City has refocused its marketing efforts and is targeting the most severely affected areas of the City to receive housing rehabilitation assistance. It is anticipated that targeting assistance will help mitigate the effects of foreclosure distress in "at risk" neighborhoods. The City will continue however, to provide single-family low-interest (3%) loans to low-income homeowners to rehabilitate their residential property up to four units on a lot. Additionally, the same types of low-income 3% loans are made available to low-income homeowners to rehabilitate their manufactured housing units. "No interest loans" or grants may also be made to fund rehabilitation required to meet lead-based paint regulations. Considering that Long Beach is a "built-out" City, providing housing rehabilitation loans enables income eligible homeowners to maintain their home, and is a powerful tool for overall neighborhood preservation during these times of economic distress.

The City also has recently implemented a new multi-family pilot program in response to the housing crisis and targets a neighborhood, which is suffering the effects of real estate foreclosure activity. The pilot program offers an innovative loan structure and terms that include no interest, deferred payments, and help to mitigate prevailing wage costs paid by the owner.

Code Enforcement

Additionally, in response to the recent foreclosure activity, the City Council enacted dramatic changes in Long Beach Municipal Ordinance 18.21. The redrafting of this ordinance enables the Code Enforcement Division to immobilize the negative impact vacant buildings can have in the City. Taking a more proactive and effective role in monitoring the sites significantly reduces the potential for blight in the community.

The ordinance requires the City to identify vacant buildings and initiate actions designed to ensure the properties are properly maintained and meet minimum code requirements until such time as they become occupied. The City investigates properties based on complaints received from the general public, City Council, and proactively via a report generated from software designed to identify properties in the City that have fallen into foreclosure.

Once a building is identified as being vacant and in violation of any City property maintenance standard, a letter is sent to the owner notifying them that the property has been entered into the monitoring program. A “Vacant Building Property Agreement” option is offered to the owner to encourage responsibility for the vacant property and to foster an effective line of communication between the owner, or his agent, and the City. This approach should result in a well-maintained property. Additionally, the agreement can save the owner substantial financial obligations related to City’s role in maintaining the property.

The ordinance requires a fee of \$145 per month for the City to monitor the property. Any other costs associated with abating nuisances such as cleaning the weeds, removing abandoned vehicles or securing the buildings are fully recoverable by the City.

This year the City has opened approximately 200 Vacant Building Monitoring cases in Long Beach.

Neighborhood Improvement

One method used by the City in preserving housing is to provide residential improvement rebates to assist in the aesthetic rehabilitation of residential properties. Over the last two years, this program has provided over 700 residential property improvements in our neighborhoods. These improvements visually improve the property as well as the surrounding neighborhood thus; the residents have a sense of neighborhood stability. Community Development Block Grant funding as well as funding from our Redevelopment Agency support this residential rehabilitation program. Since 2007, the City has leveraged over \$500,000 in set-aside money to sustain these efforts.

Additional Experience

In 1992, the LBHDC launched its first Second Mortgage Assistance Program assisting households earning no more than 120% of AMI. In subsequent years, equally successful downpayment and mortgage assistance programs followed. Since 1992, the LBHDC has assisted in excess of 900 very low-, low-, and moderate-income homebuyer households with downpayment and mortgage assistance for the purchase of their first home.

In 2007, the LBHDC partnered with the developers of two new construction for-sale condominium projects (Olive Court and Neo Zoe) and provided second mortgage assistance loans to an additional 52 low-, and moderate-income first-time buyers who purchased homes in these projects.

In furtherance of the City and the LBHDC's goals of increasing the supply of new affordable housing, \$52 million of federal HOME and local 20% tax increment set-aside was invested with developers Meta Housing, Lyon Realty, Menorah Housing, Pacific Diversified, Century Housing, and Jamboree Housing, for the development of 390 new rental units serving the senior, very low-, low-, and moderate-income population. Special consideration was given to those developers with projects that service the transit corridors. Several of these projects were completed in 2007 and 2008 and were fully leased-up immediately upon opening. Others are in the design and construction stages with scheduled grand opening dates in 2010 and 2011. Video excerpts of interviews and grand opening celebrations from several of these projects can be seen at <http://www.lbhdc.org/video.html>.

Additionally, between 1991 and 2008, the City and the LBHDC partnered with Habitat for Humanity (Habitat) by providing land donations, and over \$700,000 in the form of pre-development loans, and silent second mortgages. In return Habitat produced 32 single-family residences for-sale to households earning less than 50% of area median income. The City is currently working with Habitat on the construction of three new single-family homes and the rehabilitation of one single-family home for sale to very low-income households.

b. Management Structure

(1).Management Structure Description

The City of Long Beach has 72 employees in 4 key Bureaus in the Department of Community Development. The Bureaus and Divisions that will be directly involved in the implementation of NSP2 are the Housing Services Bureau, Neighborhood Services Bureau, Code Enforcement Division, and Administration Division. See attached Organizational chart with key names and positions managing NSP2 activities.

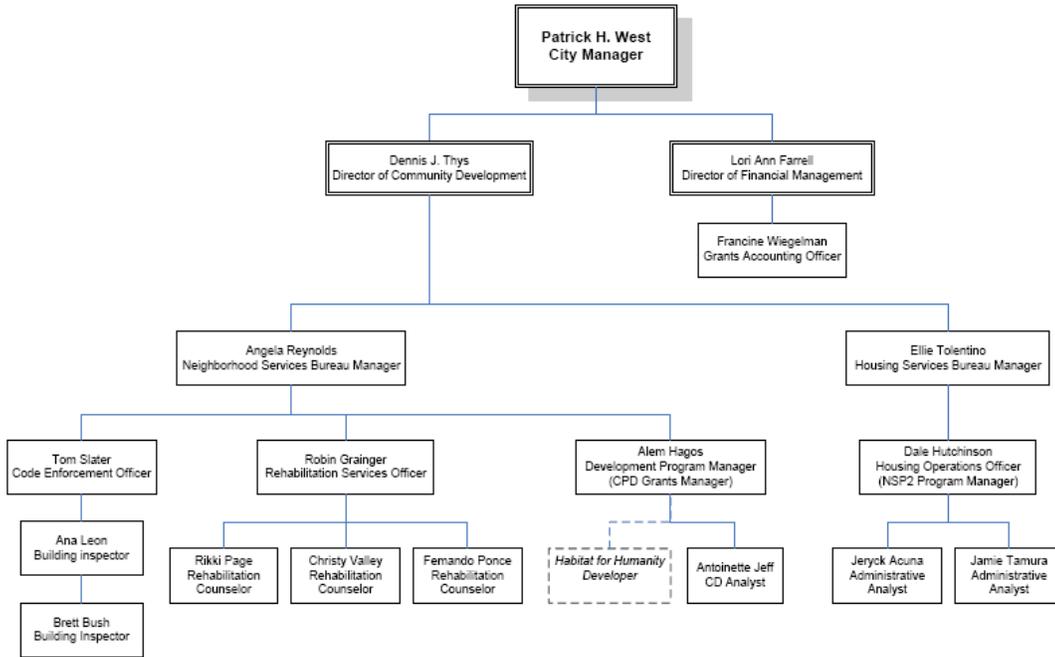

The Housing Services Bureau (HSB) will oversee the administration of the financing mechanism for the purchase and redevelopment of foreclosed properties. They will administer the establishment of waiting lists for eligible households to purchase foreclosed homes, provide program marketing and

informational meetings for the public, conduct lender and realtor trainings, confirm the income eligibility of qualified applicants, establish partnerships with mortgage lending institutions to provide first trust deed mortgage loans to qualified applicants, establish partnerships with local realtors that specialize in foreclosed properties (especially those that concentrate in HUD, Fannie Mae, and Freddie Mac foreclosed properties), and coordinate the inspections of foreclosed homes being sold to income eligible households. Key personnel in this Bureau are Ellie Tolentino, Housing Services Bureau Manager who is responsible for oversight of all Bureau activities; Dale Hutchinson, Housing Operations Officer who is responsible for oversight of the financing mechanism activities, including NSP2 training for applicants, realtors, and lenders; and Jeryck Acuna, who is responsible for buyer eligibility verification and case management.

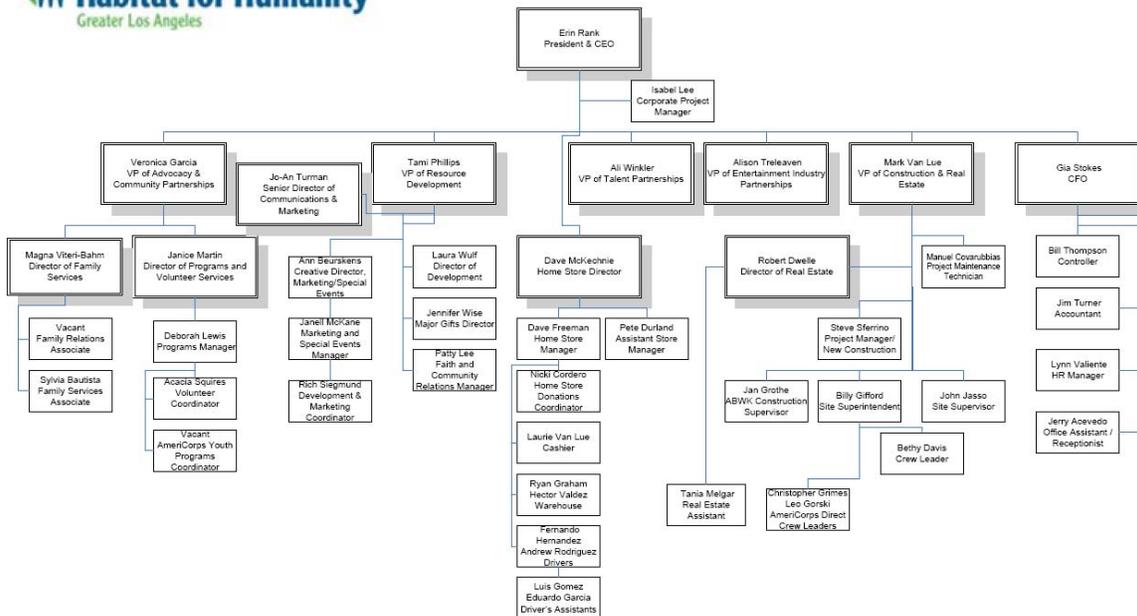

The Neighborhood Services Bureau (NSB) will oversee Habitat, the developer responsible for the acquisition, rehabilitation, and resale of foreclosed and abandoned properties to income-eligible households. NSB and HSB staff will work together to administer the inspection and rehabilitation of homes purchased by low-, moderate- and middle-income households, and provide project management services for homes that require rehabilitation. Additionally, NSB staff will oversee and administer the NSP2 budget and expenditures, including the Disaster Recovery Grant Reporting System, project and activity set-up, drawdowns, and quarterly reporting. NSB staff will also partner with the City's Department of Financial Management to provide internal audit functions to assist with the examination of program operations and management and provide feedback to program managers. Key personnel in this Bureau are: Angela Reynolds, Neighborhood Services Bureau Manager; Robin Grainger, Rehabilitation Services Officer; Tom Slater, Code Enforcement Officer; and Alem Hagos, CPD Grants Manager.

Dennis J. Thys, Director of Community Development, oversees the activities of the Bureaus.

City of Long Beach
NSP2
Organization Chart

Habitat for Humanity (Habitat) of Greater Los Angeles has 42 employees in six key departments. The departments that will be directly involved in the implementation of NSP2 are Construction/Real Estate, Advocacy/Community Partnerships, Finance and Executive Leadership.

Key Habitat staff and their specific roles and responsibilities for the day-to-day management of the proposed activities are as follows:

The Construction and Real Estate Department will act as developer and General Contractor. They will oversee the acquisition of homes in target areas, develop the scope of work, timeline and budget for each property, negotiate contracts with subcontractors, oversee construction, and assist each buyer with escrow closing including document preparation. This department also serves as property manager of each site while owned by Habitat. Key personnel in this area are Mark Van Lue, Vice President of Construction and Real Estate who is responsible for oversight of all the functions listed; Robert Dwelle, Director of Real Estate who handles acquisition and sale of the units; and Steve Sferrino, Project Director who handles scope, budget, timeline, subcontracts, and property management.

The Advocacy and Community Partnerships Department engages skilled and unskilled volunteers to assist with the rehabilitation of homes and finds buyers and readies them for homeownership. They also serve as the point of contact with each of our partner cities. They will oversee the engagement and training of thousands of volunteers to assist with our work, ensuring they have proper training, leadership, safety briefings and equipment. This department also serves as the homebuyer liaison, conducting orientations, lender meetings, homebuyer education, and providing mentorship through the escrow process. Additionally, they will negotiate relationships with partner cities, including grant agreements, selection of target areas for revitalization under NSP, and support of key City officials and staff. Key personnel in this area are: Veronica Garcia, Vice President of Advocacy and Community Partnerships who is responsible for oversight of all the functions listed; Janice Martin, Director of Programs who handles volunteer recruitment, training and engagement; and Magna Viteri Bahm, Director of Family Services who handles buyer identification, education, orientation and case management.

The Finance Division will be primarily responsible for fiscal oversight of the grant and each individual project activity under the grant. They will oversee project budgets and expenses, establish appropriate accounts to segregate funds as needed, create financial reports and oversee audits. They serve as the liaison to the organizations finance committee who review monthly financials. They will also provide oversight of the mortgages created upon sale to qualified buyers. Key personnel in this area are: Gia Stokes, Chief Financial Officer who is responsible for oversight of all the functions listed; Bill Thompson, Controller who handles monthly financial reports, audits and mortgage tracking; and Lynn Valiente, Director of Human Resources who handles hiring evaluation and human resource activity for all the employees engaged under this contract.

Erin Rank, President and Chief Executive Officer, will oversee the successful completion of all activities under the NSP award. She interacts with City officials in each partner City, including the Mayor, City Council and City staff to develop partnerships. She reviews major contracts awarded under the grant. She will

negotiate with lenders to provide loan products to NSP buyers, and engage major local REALTOR groups in the acquisition and sale of units. She will also play a key role in raising leveraged funds for the program. One other key person in this area is Isabel Lee, Corporate Programs Manager, who coordinates reporting, collaboration between partners, sets key project management meetings and ensures overall project timelines are being met.

LB house buyers get new help

HOMES: One program will offer second loans, while federal aid will allow the purchase, repair and sale of abandoned residences.

By Paul Eakins, Staff Writer

Article Launched: 12/21/2008 09:53:25 PM PST

LONG BEACH - Like most of the country, Long Beach has seen homes left foreclosed and abandoned and people left homeless as the economy plummeted.

But two new housing programs will help city officials put more Long Beach residents in homes and eliminate some of the blight of vacant houses.

On Oct. 1, the city implemented a second-mortgage assistance program that gives low- and middle-income first-time homebuyers a second loan on top of one from a standard lender.

"The city as a whole, and specifically the (City) Council, wants to increase the percentage of homeownership in Long Beach," said Dale Hutchinson, housing operations officer for the Housing Services Bureau.

Nationally, homeownership is at about 60 percent, with 40 percent of households renting.

In Long Beach, those percentages are reversed, according to U.S. Census data.

Hutchinson said homeownership can give residents a bigger stake in their neighborhoods, often reducing crime and improving communities.

"It helps bring neighborhoods up," Hutchinson said.

Chances at second loans Hutchinson said the second-mortgage program provides up to \$275,000 in 30-year, zero percent interest rate home loans, though only within the city's redevelopment areas. These areas in the central, west, north and downtown parts of Long Beach are targeted with special funding for development and infrastructure improvements.

Under the second-mortgage program, which is funded by the Long Beach Housing Development Co., residents interested in buying a home must go to one of several participating lenders where they can find out whether they are eligible for a second mortgage from the city.

Buyers can then shop for their home and apply for a loan with the lender. If approved, they can apply for a second mortgage loan through the city if the initial loan didn't cover the price of the home.

Not just any home will be accepted for a city loan, Hutchinson said. City code enforcement officers must inspect the property first.

presstelegram.com

"Obviously, it wouldn't behoove us to buy a property that could fall down tomorrow," Hutchinson said.

If the owners sell the property within the 30-year lifetime of the loan and make a profit, they must share a percentage of the profit with the Housing Development Co.

So far, Long Beach hasn't issued any second mortgage loans, but 126 applications have been submitted, Hutchinson said.

The second mortgage program replaces a previous down-payment assistance program that ended in 2005, he said. That program provided up to a \$10,000 grant for the down payment on a home, but it became less effective as home prices skyrocketed, Hutchinson said.

Eliminating blight

In a separate housing initiative, Long Beach is receiving

\$5 million from the federal Housing and Economic Recovery Act that Congress passed in July so it can buy, fix up and resell abandoned homes, according to Dennis Thys, director of Community Development.

"We have to acquire the properties, rehabilitate them and make them available for families making not less than 120 percent of median," Thys said.

Thys said the program will focus on properties in

three areas particularly affected by the foreclosure crisis: the neighborhood around Washington Middle School on Cedar Avenue in West Long Beach, the northwest corner of the city near Compton, and in Central Long Beach.

The city's housing plan, which has been submitted to the federal Department of Housing and Urban Development for approval, includes not only reselling restored homes, but also buying vacant or foreclosed multifamily buildings and giving them to nonprofit agencies to house Long Beach's poorest families, Thys said.

He said that 22 housing units are expected to be produced under the program, and that if it's successful, more federal funds may be forthcoming.

In the meantime, the city has been actively monitoring vacant properties since the council approved a new vacant property ordinance six months ago to stem the deterioration of properties.

"We are very proactively monitoring every property that's gone into foreclosure," Thys said.

The price for home is right

HOUSING: Sixty-four families in the West Gateway area celebrate the new opportunity.

By Greg Mellen, Staff Writer

Article Launched: 07/08/2008 09:55:58 PM PDT

Long Beach Vice Mayor Bonnie Lowenthal addresses a crowd during the grand opening of the Puerto Del Sol affordable housing complex in Long Beach Tuesday. Resident Patricia Wright, without a home for years, called the new development "the overflow of God's blessing." (Scott Smeltzer/Staff Photographer)

LONG BEACH - For Sopana Sann, 22, affordable housing means a chance for his young family to gain its footing before beginning to climb to a more affluent lifestyle.

For Patricia Wright, a 57-year-old disabled grandmother, it means a chance to relax after fighting to survive through seven years of

homelessness.

For 64 families in different stages of life, Puerto Del Sol offers a new beginning.

The affordable housing complex in the West Gateway development area officially opened its doors Tuesday as part of festivities celebrating Affordable Housing Week in Long Beach.

Sann is a student at Long Beach City College with a double major, a full-time job and a two-year-old baby girl.

Until just

Patricia Wright, a resident of Puerto Del Sol affordable housing, gets a hug from Deborah Fryman of Jamboree Housing Corp. at the complex's opening. (Scott Smeltzer/Staff Photographer)

recently he, his wife, Vemol So, and daughter, Kalyn, lived in an apartment with his mom and two brothers.

"Affordable housing means I can buy books, food and especially gas," Sann said.

"Now I can live independently, pay bills and save

presstelegram.com

for the future."

Money is still tight for the young family.

On an easel above the desk in Sann's apartment the word "Bills" is written in large letters, with different utilities and amounts listed beneath.

Sann would like to move into public administration possibly and his wife is studying to become a registered nurse.

Wright says she has lived in motels, on friends' couches and in the backs of cars over recent years. Now she and her son, who is also disabled, share a two-bedroom apartment.

She says when she told friends she had moved downtown, they asked if she was living under a bridge. But she has a ready reply.

"I am living the overflow of God's blessing," Wright says.

As part of the inaugural group of Puerto Del Sol residents, she says it will be up to her and others to set a positive example for future residents in the community.

For the 65 officials, politicians, city staffers and residents who showed up at the event,

Puerto Del Sol's opening represented the culmination of a five-year journey since developer Jamboree Housing began planning for the one-acre site.

Pat Brown, chairman of the Long Beach Housing Development Company, which paid for half of the complex using mostly Redevelopment Agency money, says Puerto Del Sol was worth the wait.

Like much of West Gateway, it has been a long time coming and was more costly than expected.

Although Jamboree Housing broke ground for the project in February 2005 and was slated to complete construction by the fall 2006, the project was plagued by early delays.

Laura Archuleta, president of Jamboree Corporation, says construction was delayed when lead paint and other contaminants were found in the ground.

She added that coincided with the aftermath of Hurricane Katrina, when construction costs spiked nationally.

Originally tagged as a \$21.5 million project, Puerto Del Sol came in at \$26.4 million.

The Long Beach Housing Corporation originally put in \$9.4 million for construction, then had to issue another \$2.4 million in bonds in July 2005.

The complex is four stories and comprises 64 two-, three- and four-bedroom townhouse-style apartments for families making 40 percent to 50 percent of local median household income.

As a result, a family of four making \$37,900, which is 50 percent of the area median income, will pay \$633 rent per month.

presstelegram.com

Rents range between \$599 and \$799 per month:

Brown says he prefers to call it "workforce" housing because most of the families are wage earners.

All units include wiring for high-speed Internet, security systems, private balconies, appliances including ovens, dishwashers, refrigerators, disposals and microwaves carpeting and window coverings.

The complex has a community center with a kitchen, activity rooms and computer center.

Included are on-site resident services and programs including homework assistance and tutoring, consumer credit counseling, ESL classes, financial literacy and pre-employment counseling, as well as referrals to city and community services.

The city says some 1,000 tenant applications were turned in for Puerto del Sol before its doors even opened and all units have been filled.

Prospective tenants underwent credit and criminal checks, as well as home visits from the John Stewart Company, the property managers, before they were accepted.

While the rest of the West Gateway project, which includes market-rate housing, has faltered in the recent mortgage upheaval across the state, Archuleta said even in a down market, a complex like Puerto Del Sol draws plenty of interest from funding organizations.

According to Michael Massie, the housing development manager for Jamboree, Puerto Del Sol had seven levels of funding from federal, state, city and private sources.

Long Beach's Affordable Housing Week continues today with a tour of affordable housing sites, a forum on Thursday and a pair of open houses on Friday.

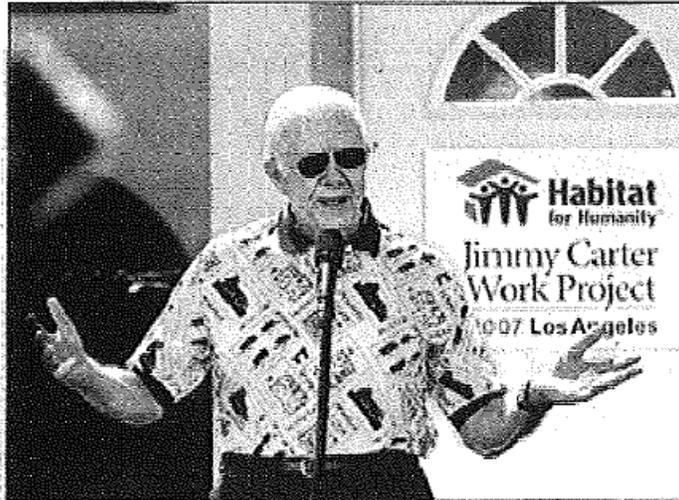

Information is available by calling the Long Beach Housing Development Company at 562-570-6949.

Habitat for Humanity:

Los Angeles Times

Sunday, April 1, 2007

REED BUCKER / Associated Press

HUMANITARIAN WORK: Former President Jimmy Carter announces that Los Angeles will be the first city for Habitat for Humanity's 2007 work project — building or repairing homes for the needy.

Nonprofit to build 14 townhouses

Habitat for Humanity will turn a vacant lot into Vermont Village for low-income families.

By **MAKRA GROVES**
From San Pedro

For nine years, Brian Florida Fisher, his wife, LIZZA, and their four children have transformed themselves into a two-bedroom apartment in Kierland.

Later this year, their housing picture promises to brighten considerably when they move into a new three-bedroom townhouse in South Los Angeles.

"We feel so excited," said Fisher, who installs vehicle tracking devices for a living. "We never thought we'd qualify for this nice program."

The program is Habitat for Humanity's Jimmy Carter Work Project, an annual five-day event during which volunteers — including the former president and his wife, Rosalynn — build or repair houses for low-income residents.

At a news conference Saturday at a long-abandoned lot on South Vermont Avenue at 118th Street, Carter announced that the project had selected Los Angeles as its 2007 host city.

Carter told a friendly crowd that he and his wife would return in late October to help transform

the site into Vermont Village, with 14 townhouses and a children's playground.

They also will found calls to a 16-home development in San Pedro. In addition, volunteers will fix roofs and make other repairs on 70 dwellings belonging to low-income families throughout Los Angeles.

Carter and his wife last built houses in Los Angeles in 1983, when they and hundreds of volunteers constructed 24 homes in Watts. He noted that the original residents have remained in those houses.

"Most people lucky enough to get into a Habitat house stay in them and pass them down," he said, adding that home ownership provides "a new life for them."

Since 1984, the Carters have spent a week each year building homes for Habitat in the United States, India, South Africa, the Philippines and elsewhere.

Last year, they ventured to New Orleans, where much of the housing stock had been decimated by Hurricane Katrina. They plan to return to New Orleans in 2008.

"Los Angeles is faced with a housing crisis that leaves many of our residents unable to reach the American dream of home ownership," said Mayor Antonio Villaraigosa, who joined Carter at the news conference. He said the city planned to contribute

\$2.1 million toward the nearly 10-million cost of the two projects; the state also will kick in funds.

Eric Rank, president and chief executive of Habitat for Humanity of Greater Los Angeles, said the median income of renter households in Los Angeles is about \$18,460 and the median home price is an out-of-reach \$333,160.

By contrast, Habitat plans to charge "qualifying" families \$146,000 for their townhouses and give them 30 years to pay off the 0% interest-free mortgages.

"With property tax and insurance, families' monthly cost should come to about \$600, Rank said.

Councilwoman Janice Hahn, whose district includes both projects, said the fit like her constituents had "won the lottery."

"When people can't afford their own houses," she said, "the neighborhood improves and kids do better in school."

Carter said he expected no lack of volunteers for the Oct. 18 to Nov. 3 construction work. He noted that Brad Pitt's appearance at last year's project near Mumbai drew so many participants that "we could hardly find our hammer."

Fit, he added, plans to pitch in come October.

GOODBYE FROM HABITAT O'NEILL THANK YOU FAMILY'S HOME

Author: Kristopher Hanson

Edition: AM

Section: NEWS

Page: A01

Dateline: LONG BEACH

Estimated printed pages: 2

Article Text:

It was scheduled as a thank you to outgoing Mayor Beverly O'Neill for her commitment to revitalizing Long Beach, but nobody in the crowd gathered Monday for a home renovation project was more thankful than Gabino Nuez.

Nuez, his two daughters and son are the recipients of a Habitat for Humanity home-building project, dubbed the "Mayor's Build" in honor of O'Neill, which will allow them to move out of the tiny converted garage they currently occupy in North Long Beach.

near Fifth Street and Gaviota Avenue in Alamitos Beach. The city purchased the run-down residence, and Habitat plans to expand the lower level, add an elevator for son Antonio, remodel the interior, and convert two of the home's four single-car garages into living space. They also plan to paint and landscape.

Antonio, 16, is in a wheelchair after a car accident several years ago that claimed his mother's life. The family, which includes Gabino, Antonio, Lizbhet and Sandra, has been living in a small garage lacking insulation, with exposed plumbing and no storage space.

Work began at the new home Monday, and the Nunezes are expected to move in by October, said Kimball Diamond, Habitat vice president of construction and real estate.

The home is being built through volunteer labor provided by Habitat with funding from Home Depot, Downtown Long Beach Lions Club, Charter Communications, Southern California Edison, British Petroleum and Boeing Co.

O'Neill, a three-term mayor who oversaw the departure of the Navy, a downtown revitalization, expansion of the port, dropping crime and a housing boom, is leaving her post in July after 12 years. Barred from having her name placed on the ballot after two terms, the former Long Beach City College superintendent-president ran a successful write-in campaign in 2002.

Caption:

Gabino Nuez, left, and daughters Sandra and Lizbhet join Home Depot helpers as Habitat for Humanity begins a renovation project for their new home. It will offer space for the whole family, including an elevator for their brother Antonio, who is in a wheelchair. The Downtown Long Beach Lions Club and several local firms, including Home Depot, contributed to the project.

Gabino Nuez helps knock down a garage in a ceremony Monday to mark the start of a Habitat for Humanity-built home for his family. Plans for the residence include an expanded lower level, an elevator for son

GRID Alternatives

969 Sandhill Avenue, Carson, CA 90746 • 310-324-8146 • www.gridalternatives.org

June 26, 2009

Veronica Garcia
Vice President of Advocacy and Community Partnerships
Habitat for Humanity of Greater Los Angeles
17700 S. Figueroa Street
Gardena, CA 90248

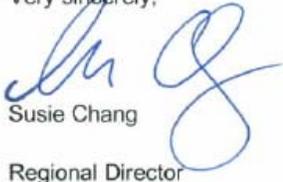

Dear Ms. Garcia:

This letter is to express GRID Alternatives' strong support for your application for Neighborhood Stabilization Program 2 (NSP2) funding under the American Recovery and Reinvestment Act of 2009. We are committed to partnering with Habitat for Humanity of Greater Los Angeles to leverage the existing statewide Single-family Affordable Solar Homes (SASH) Program to provide solar electric systems at low or no cost to eligible homeowners who are part of your NSP2 Program.

GRID Alternatives will educate NSP2 homeowners on solar power and energy efficiency, and help them apply for the SASH Program which offers high rebates for solar electric systems to low-income homeowners. We will also be the solar contractor for eligible projects and provide training to homeowners who own a system. Through SASH rebates, GRID Alternatives' ability to secure discounted equipment pricing, and our commitment to providing cost-effective solar electric systems to low-income homeowners, systems with a value of \$6,000 to \$25,000 are available to qualified homeowners for free or up to \$5,000. These systems could help reduce each household's monthly electricity bills by up to 75%, potentially saving homeowners well over \$10,000 over the lifetime of the system. This continuous source of savings will help keep housing costs affordable in the long term.

GRID Alternatives appreciates the positive, on-going partnership with Habitat. We have installed 30 solar electric systems for partner families in partnership with your affiliate and have continued to work together. We have plans to continue our partnership to be able to serve both existing partner families as well as future ones through Habitat's new construction projects. It would be our great pleasure to participate in the HUD Neighborhood Stabilization Program and help Habitat fulfill its vision of rehabilitating homes and redeveloping properties to meet local housing needs.

Very sincerely,

Susie Chang
Regional Director

Generating Renewable Ideas for Development Alternatives

3. Factor 3 – Soundness of Approach

a. Proposed Activities

(1). Briefly describe the overall stabilization program

The City proposes to use NSP2 funds to carry out our neighborhood revitalization and stabilization efforts through the following CDBG eligible activities. These activities will expand on efforts currently carried out through the City’s Second mortgage Assistance Program as well as the City’s NSP1 activities. 1) Activity A - Financing mechanisms to assist low-, moderate-, and middle-income homebuyers with the purchase of foreclosed properties, and 2) Activity B - Purchase and rehabilitate abandoned and foreclosed properties and resell to households earning less than 50% of area median income.

These programs are in compliance with the following NSP-eligible uses:

| Activity | NSP Eligible Use | CDBG Citation |
|----------------|---|--|
| A | Establish financing mechanisms for purchase and redevelopment of foreclosed upon homes and residential properties, including such mechanisms as soft-second, loan loss reserves, and shared-equity loans for low- and moderate-income homebuyers. | CDBG – 24 CFR 570.201(n) direct homeowner assistance (for Silent Second Loan and downpayment assistance) And 24 CFR 570-202(b) rehabilitation grant |
| B | Purchase and rehabilitate homes and residential properties that have been abandoned or foreclosed upon, in order to sell, rent, or develop such homes and properties. | CDBG – 24CFR 570.201 Acquisition Disposition CDBG –24CFR 570.202 (b) Rehabilitation |
| Administration | Establish financing mechanisms for purchase and redevelopment of foreclosed upon homes and residential properties, including such mechanisms as soft-second, loan loss reserves, and shared-equity loans for low- and moderate-income homebuyers. | CDBG – 24 CFR 570.206 |

National Objectives: Must be a national objective benefiting low, moderate and middle income household, as defined in the NSP2 Notice.

Program Outcomes

- Stabilize current decline of housing values in the City (*Baseline: current average value in targeted areas - \$333,052*)
- Reverse the current decline of homeownership in the City by creating at least 111 homeowner households (*Baseline: 48% of the housing stock in the targeted area is owner-occupied.*)
- Create/retain several hundred construction jobs as a result of the rehabilitation, at minimum, 111 residential properties (*Baseline: For every \$35,000 expended on housing rehabilitation, one job will be created/retained.*)
- Remove, at minimum, 111 residential units from foreclosure
- Focus resources in neighborhoods most severely impacted by vacant and foreclosed homes
- Teach new homeownership skills to, at minimum, 111 households
- Create additional homeownership and ensure longest feasible continued affordability by sustaining the NSP2 Program after the grant's funds are expended, by using local, State, and other Federal housing grants.
- Stabilize and preserve housing stock by ensuring all assisted units are maintained to health, building and safety codes.

Every home purchased with the assistance of NSP2 funds under Activity A will be required to undergo a code inspection, and if built prior to 1978, a lead inspection as well. City staff will conduct these inspections with funding from the City's local 20% tax increment set-aside funds.

Activity A goals are currently achieved through a Second Mortgage Assistance Program (SMAP). The SMAP provides silent second mortgage assistance loans to first-time homebuyers who purchase eligible homes in Long Beach. These loans are funded with federal HOME, state CalHome, and local 20% tax-increment set-aside funds totaling \$12 million. The SMAP has surpassed original estimates of interest in first-time homebuyers mortgage assistance products. Since October 2008, the SMAP has qualified 119 households who earn less than 120% of area median income (AMI). 34 households have closed escrow and another 27 are scheduled to close escrow by August 1st. Due to limited resources the City is unable to assist the remaining 58 approved households with purchase of their first home. However, with NSP2 **Activity A** funding, these households may have an opportunity to become first-time homebuyers.

The SMAP has surpassed our original estimates of interest in first-time homebuyers mortgage assistance products. Since October 2008, the SMAP has qualified 119 households who earn less than 120% of AMI. 34 households have closed escrow and another 27 are scheduled to close escrow by August 1, 2009. Due to limited resources, the remaining 58 approved households could not be assisted. All resources have been committed to borrowers that have opened escrow on eligible properties. However, with NSP2 funds, these 58 households

and more will have an opportunity to become first-time homebuyers through Activity A financing mechanisms.

Activity B goals are achieved by the City's Neighborhood Services Bureau, though the purchase, rehabilitation, and resale of foreclosed or abandoned properties with \$5 million of NSP1 funding. To date, the City has placed offers on 10 single-family properties 9 offers have been accepted and 7 have closed escrow. Rehabilitation efforts are underway on the 3 properties that have closed escrow. Property inspections and rehabilitation efforts will commence on the other 6 properties upon the close of escrow. These properties will be sold to households that were income-qualified through the City's SMAP but were unable to participate in the program due to lack of funding.

Activity A and B programs will result in stabilization of the housing market over a 36-month period through an increase in the percentage of owner-occupied homes, an increase in the number of code-compliant homes, and a decrease in the number of absentee landlord homes. Additionally, moving income qualified renters into homeownership can assist in achieving long-term economic benefits. The household populations served by these activities often spend between 50% and 80% of their income towards their monthly housing costs leaving little or no disposable income. Households that participate in these activities will have housing costs ranging from 30% to 35% of their incomes, resulting in more disposable income to invest in their communities by shopping and dining at local stores and restaurants.

In addition to furthering the City's revitalization and stabilization efforts already underway by providing capital needed to continue successful existing programs, NSP2 funding will augment the revitalization efforts in several NSP2 Census Tracts in progress by the Housing Services Bureau of the City's Department of Community Development. The combination of the NSP2 funded and existing revitalization efforts will accelerate the overall stabilization and improvement efforts of the City, resulting in an increase in code compliant homes, a reduction in the housing cost burden of households earning less than 120% of AMI, an increase of owner-occupied homes in areas most affected by the housing crisis, and a decrease in the number of absentee landlord homes.

In 2004 the City of Long Beach adopted a Housing Action Plan (HAP), which builds upon the policies outlined in the City's 2000-2005 Housing Element and 2010 Strategic Plan. A copy of the HAP can be located at <http://www.lbhdc.org/pdf/HAP.pdf>. The HAP identified three "Focus" areas in Long Beach with the greatest need for neighborhood revitalization and stabilization: Central, Washington School, and North King School Area. These focus areas were established based on several factors including poverty rates, overcrowding, substandard conditions, crime statistics, and absentee ownership. The Focus areas are home to over 33,000 residents and 9,489 housing units.

To carryout the goals of the HAP, the City began the revitalization and stabilization process in 2005. Since that time, the City has invested \$14 million

of Redevelopment Housing Bond proceeds in the acquisition of 22 blighted multi-family properties. These properties are in the redevelopment stage and when complete will be rented and sold to households earning no more than 120% of AMI.

Following is a list of the Census Tracts included with this application that correspond with a City of Long Beach HAP Focus Area:

Census Tract HAP Focus Area:

573202 Central
570401 North King School
575401 Washington School
575402 Washington School

(2).Uses of Funds and Firm Commitments

(a).NSP Fund Use

NSP2 funds will be used by the City and its consortium partner, Habitat, to carry out financing mechanisms for the redevelopment of foreclosed properties and the purchase, rehabilitation, and resale of foreclosed and abandoned properties in accordance with the following schedule.

The City will carryout the homeownership financing mechanisms and Habitat will carryout the purchase, rehabilitation, and resale activities.

(b). Proposed Activity Description

| Activity | # of Units | Income Level | Acq/Rehab/Resale NSP2 Funded | Mortgage Assistance NSP2 Funded | Rehab NSP2 Funded | Downpmt Assistance Grant - NSP2 Funded | TOTAL NSP2 Funds | Estimated NSP2 Budget | Leverged Funds | Unit | Total Leverged Funds |
|--|------------|-----------------------|------------------------------|---------------------------------|-------------------|--|------------------|-----------------------|----------------|-----------|----------------------|
| A | | | | | | | | | | | |
| Homeownership Financing Mechanisms | 51 | Low 51-80% AMI | \$0 | \$200,000 | | \$10,000 | \$210,000 | \$10,710,000 | \$29,412 | 51 | \$1,500,000 |
| Homeownership Financing Mechanisms | 24 | Middle 81-100% AMI | \$0 | \$77,541 | \$30,000 | \$10,000 | \$117,541 | \$2,820,980 | | | |
| Homeownership Financing Mechanisms | 11 | Moderate 101-120% AMI | \$0 | \$45,000 | \$30,000 | \$10,000 | \$85,000 | \$935,000 | | | |
| Total Homeownership Financing | 86 | | | | | | | \$14,465,980 | \$2,616 | 86 | \$225,000 |
| B | | | | | | | | | | | |
| Purchase, Rehabilitate Foreclosed and Abandoned Properties | 25 | Very-Low 50% AMI | \$222,560 | | | | \$222,560 | \$5,564,000 | \$9,000 | 25 | \$225,000 |
| Administration 10% | | | | | | | \$2,220,000 | \$2,220,000 | | | |
| Total NSP2 Grant | 111 | | | | | | | \$22,249,980 | | | \$1,950,000 |

Under the homeownership financing mechanisms, the City will provide first-time homebuyers with a combination of second mortgage assistance loans, rehabilitation loans and grants, and downpayment assistance grants.

The NSP2 funded second mortgage assistance loans will be for a 30-year term. They will be interest free, with no monthly payments. However, should the homeowner sell or otherwise transfer the property prior to the 30-year period, contingent deferred interest, in the form of equity share may apply to the net proceeds of the sale. The principal amount of the loan will be due and payable after 30 years.

With NSP2 funding, the City, in partnership with Habitat for Humanity will continue their revitalization and stabilization efforts through the purchase, rehabilitation and resale of homes to families earning less than 50% of area median income. Using their very successful revitalization model, they will provide a comprehensive plan that includes full service foreclosed and abandoned home redevelopment. Habitat will identify and acquire properties, perform assessments, develop budgets, select buyers, perform rehabilitation work (buyers will contribute of sweat equity). These homes will be sold to the qualified buyers in an amount not to exceed the total cost of acquisition and rehabilitation. Buyers will obtain either 30-year fixed-rate mortgages through a private lender or a zero interest 1st Trust Deed loan using NSP2 funds. NSP2 funds will remain in the project to finance the gap between the sales proceeds and the borrowers 1st Trust Deed mortgage loan. Sales proceeds

from private mortgages and buyers payments from NSP2 funded mortgage loans will become NSP2 Program Income (PI) and will be reinvested in the program to finance the next unit.

(c).Fund Commitment Status

In 2009, the State of California Department of Housing and Community Development awarded the City of Long Beach a \$1.5 million CalHome grant, to be used for the rehabilitation of single-family homes. The City has 36 months in which to spend these funds.

(d). Demolitions and Preservation

The City has no plans to use NSP2 funds for demolition or preservation purposes.

b. Project Completion Schedule for Activity A and B

| Cumulative | | 2% | 12% | 31% | 50% | 64% | 72% | 80% | 88% | 95% | 99% | 100% | 100% |

Post-Purchase Activities:

The City will utilize its Affordable Housing Monitoring Division staff to provide post-purchase annual owner-occupancy verification reviews. Additionally, our first-time homebuyer assistance program staff will assist clients with their post-purchase needs, such as loan payoffs requests and equity sharing calculations.

c. Income Targeting for 120% and 50% of Median

The City will ensure that 100% of NSP2 funds will be used to benefit individuals and households with incomes below 120% of area median income (AMI). In addition, at least 25% of NSP2 funds will be used to benefit individuals and households with incomes below 50% of AMI.

Households earning between 51% and 120% of AMI will be assisted through the Second Mortgage Assistance Program (SMAP). The homeownership needs of households earning less than 50% of AMI will be assisted through the acquisition/rehabilitation, and resale efforts of Habitat for Humanity.

d. Continued Affordability

To ensure the continued affordability of projects funded by NSP2, affordability covenants will be recorded against each property for a 30-year period. Sales of homes prior to the 30-year period will be subject to the recapture of the NSP2 investment, plus an equity share based upon the appreciation in the homes values from the date of purchase to the sale date. Additionally, the Monitoring Division of the City’s Housing Services Bureau will annually review these properties to ensure compliance with the occupancy and other post-purchase requirements.

e. Consultation, Outreach, and Communication

In developing the Action Plan for NSP1 funding, the City reviewed data from the Comprehensive Housing Affordability Strategy (CHAS), First American CoreLogic and DataQuick to identify those areas with the greatest need for revitalization and stabilization. In accordance with HERA requirements the City considered areas with 1) Greatest percentage of home foreclosure; 2) Highest percentage of homes financed by a sub prime mortgage related loan; and 3) Areas identified as the most likely to face a significant rise in the rate of home foreclosures. Evaluation of this data identified the North and Central areas of Long Beach most at risk of becoming blighted due to large numbers of vacant foreclosures.

Additionally, in 2004 the Long Beach City Council adopted a Housing Action Plan (HAP), which details a five-year plan to focus resources to three areas within the City (Central, North, and the Washington area) that were identified as most in need of revitalization and stabilization. The HAP builds upon policies contained in two key City planning documents adopted by the City Council: the 2000-2005 Housing Element and the Long Beach 2010 Strategic Plan.

The Housing Element is a component of the General Plan. It sets forth the City's housing goals, policies and programs to address identified housing needs, including regional growth needs adopted by the Southern California Association of Governments (SCAG). Incidentally, the California Department of Housing and Community Development recently certified the 2008-2014 Housing Element.

The 2010 Strategic Plan identifies the restoration of neighborhoods as the center of community life and the most important step Long Beach can undertake to build toward a positive future in the 21st century. The Strategic Plan provides the foundation for development of both the Housing Element and the HAP and sets forth the following principles:

- Build a strong network of healthy neighborhoods in Long Beach;
- Support neighborhood efforts to create beauty and pride by removing blight and providing high-quality and well-maintained public infrastructure, parks and public facilities in each neighborhood;
- Improve the quality and availability of neighborhood housing by addressing declining homeownership, deteriorating neighborhoods, and increasing overcrowding

The City will continue its current outreach and affirmative marketing efforts through the Long Beach Housing Development Company (LBHDC) using its Second Mortgage Assistance Program (SMAP) marketing model. In conjunction with the SMAP, the LBHDC partnered with select lenders, who provide comprehensive marketing efforts in a variety of ways, including; Bi-monthly buyer seminars that feature City programs targeted to first-time homebuyers; high-frequency outbound e-mail, letter and postcard campaigns to Long Beach-based realtors and citizens; bi-monthly realtor seminars; and in-office "lunch and learn" programs. Local realtors

also conduct community meetings designed to inform residents of homebuyer programs, such as the SMAP.

Additionally, the LBHDC promotes and markets programs through its' website at www.lhdc.org, as well as through its monthly public access TV show, "Inside Long Beach", which is produced in conjunction with the Long Beach Redevelopment Company (RDA) and Pacific Gateway Workforce Investment Network. To promote the City's affirmative marketing efforts, staff also attends various community meetings and activities in target neighborhoods to market programs to potential homebuyers who may otherwise be unlikely to apply for housing programs.

The communication of program design and opportunities will take place primarily through our select lenders, the LBHDC's website, the Inside Long Beach monthly TV show, and program staff by way of community informational meetings. All complaints are reviewed by City staff and responded to within 15 days.

f. Performance and Monitoring

The City of Long Beach Community Development Department, Neighborhood Services Bureau has been managing Community Planning and Development (CPD) grants from the inception of these grants. As such, the Bureau has extensive experience in developing and implementing monitoring policies and guidelines as they apply to CDBG, ESG and NSP1 Grants. The Bureau's CPD Grant Administration Division utilizes a highly trained and dedicated staff monitor that oversees and works closely with program/project coordinators to ensure production, accountability, and compliance of federal regulations as it relates to program administration. The grant monitor uses various standardized tools such as, checklists and program review sheets developed over the years and recently modified to incorporate new CPD's Outcome Performance Measurement (PM) framework when carrying out the monitoring process.

The staff monitor of the CPD Grant Administration Division will also coordinate management and monitoring of the NSP2 grant. Currently the Bureau is overseeing the implementation and administration of NSP1 grant and has been using DRGR to administer the grant.

Framework for Monitoring NSP2 Program Activities:

A NSP2 monitoring policy and procedure guide that includes an internal audit function will be developed and implemented. The guide will include:

- Standardized implementation procedure;
- Standardized procedures for reporting by program service providers;
- Standardized procedures for programmatic and financial monitoring frequency and reviews;
- A system that will assess all stages of implementation to identify potentially risky areas of program operations;

- Availability of staff and other resources to assist in meeting NSP2 regulations and compliance monitoring;
- HUD-required records and information to be collected;
- NSP2- qualified applicant waiting list procedure;
- Concise NSP2 program guidelines brochure for the public; and
- Comprehensive yet easy to understand NSP2 homebuyer application

Additionally, the Neighborhood Services Bureau will develop, follow, and incorporate monitoring standards and procedures regarding NSP2 program activities to ensure production and accountability, compliance, consistency with federal requirements, and to evaluate organizational and project performance. The City's NSP2 monitoring standards and procedures will include the following:

- 1) The City will monitor the NSP2-funded program activities to ensure that NSP2 funding is used in conjunction with nonprofit partners, in accordance with NSP2 regulations.
- 2) The City will monitor all activities undertaken with NSP2 funds to ensure that they are consistent with the City's NSP2 application.
- 3) The City will monitor the status of NSP2 grants to ensure the required deadline to expend NSP2 funds.
- 4) The City will monitor leveraging of NSP2 funds with local and nonprofit dollars as specified in its application.
- 5) The City will monitor NSP2 activities to ensure that the activities are eligible under the NSP2 Program and the associated costs are related NSP2 goals.
- 6) The City will monitor NSP2 activities to ensure implementation of the Office of Management and Budget (OMB) applicable directives and will use the current CPD grant financial structure that the City utilizes, including strict separation of duties that cross City Departments.
- 7) The City will monitor NSP2 activities to ensure compliance with the NSP2 rehabilitation activities including energy efficient rehabilitation.
- 8) The City will monitor NSP2 activities to ensure that NSP2 funds are used to assist households with incomes at or below 120% of the area median income, and to ensure that 25% of NSP2 funds are designated to households whose income is at or below 50% of area median income.

Internal Audit Function:

NSP2 grant administration will set up an internal audit group comprised of the NSP2 grant administration staff from the City's Neighborhood Services Bureau, project coordinators from the City's Housing Services Bureau, the Grant Accounting Officer from the City's Financial Management Department and coordinators from

participating nonprofit agencies. This group will meet monthly in the first quarter of NSP2 implementation stage and meet on a quarterly basis thereafter.

The internal audit group will assess potentially risky areas of program operations, share experiences, develop ideas, and make recommendations for program implementation changes as deemed necessary to strengthen program outcome.

4. Factor 4 – Leveraging Other Funds or Removal of Substantial Negative Effects

a. Leverage

The City, in this application, is providing evidence of firm commitment and specific amounts on the following non-NSP, non-CDBG and non-federal resources for investment in its proposed NSP2 programs.

| Resource | Amount/Form | Use | Average Amount Per Unit |
|---|-----------------------------------|---|----------------------------------|
| State- CalHome | \$1,500,000 Differed Payment Loan | To augment NSP2 funds for rehabilitation of 60 foreclosed homes | \$25,000 |
| Estimated borrower downpayment contribution | \$225,000 | Financing – excluding downpayment assistance | \$2,000 per unit |
| Private nonprofit* | \$225,000 in-kind | To augment NSP2 funds for rehabilitation of 25 foreclosed homes | \$9,000 in contributed materials |

* As evidenced by firm commitment letter from Habitat

As evidenced in the commitment letter in Appendix 5, the City will invest a total of \$1,950,000 in its proposed NSP2 activities. The City’s leverage ratio to requested NSP2 funds is approximately 9:100.

b. Calculation of Removal of Negative Effects

The City, in its proposed NSP2 activities, plans to acquire and rehabilitate more than 25 properties in the identified target areas, hence requiring the calculation of removal of negative effects using HUD provided rubric:

Formula:

$$\frac{(1.5 (\text{sum total of vacant properties proposed to be addressed through acquisition and rehab}) + (\text{sum total of vacant properties proposed to be addressed through demolition}))}{\text{Sum total of all vacant residential properties in target area}}$$

Computation:

$$\frac{(1.5(111)+(0))}{1359} = 166.5:1359 = \text{Ratio is approximately } 1:8.16$$

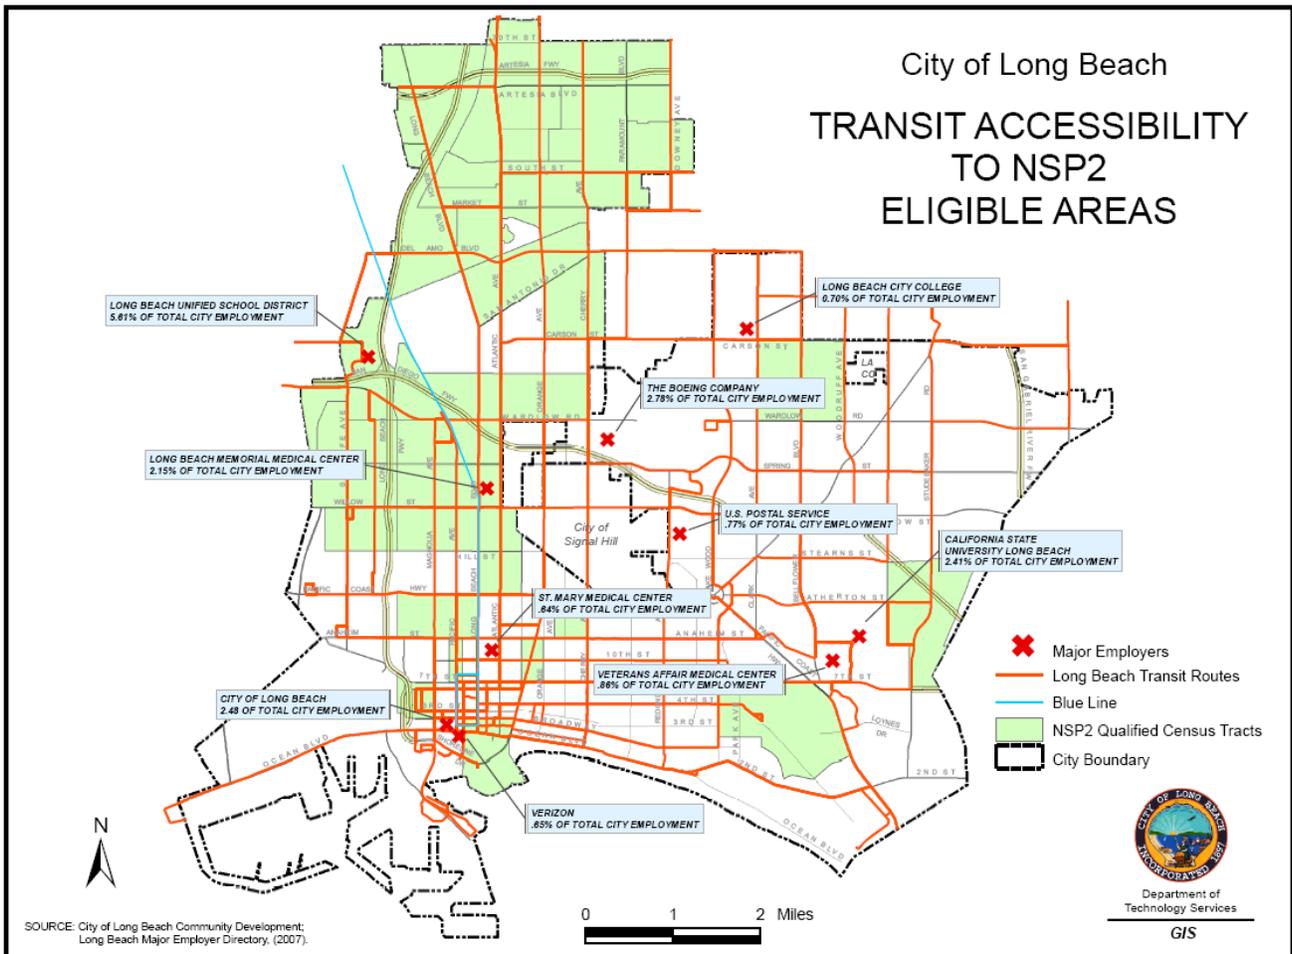

According to the ratio above, the City, through its proposed NSP2 acquisition and rehabilitation program, will remove 1 foreclosed and vacant property (blighted home) for every 8.16 vacant residential properties (both foreclosed and non-foreclosed) in the identified areas, in order to stabilize the targeted areas.

The data for computation of the above formula was obtained from “HUD Aggregated USPS Administrative Data On Address Vacancies”. Please refer to Appendix 3 for data by census tract. <http://www.huduser.org/DATASETS/usps.html>

5. Factor 5 – Energy Efficiency Improvement and Sustainable Development Factors

a. Transit Accessibility

In Long Beach, about seven percent of employed persons depend on public transportation to go to work. However, according to 2000 Census data, 23 percent of the City’s elderly households (5,858) do not have access to a vehicle and must depend on public transit to get around town. As shown in the following map, nearly all areas of the City including all NSP2 eligible areas are within one-quarter mile of a transit route that has access to regional employment center. In addition, Long Beach Transit routes run seven days a week, in intervals of 15 minutes or less during rush hours, exceeding transit accessible definition as described in NSP2 notice.

Long Beach Transit:

Public transportation in the City of Long Beach is provided primarily by Long Beach Transit. Long Beach Transit offers 38 bus routes that provide fast, reliable service to residents in air-conditioned comfort. All of Long Beach Transit's routes are wheelchair accessible and connect with the Metro light rail services to Los Angeles, El Segundo and Norwalk. The service also provides access to all of Long Beach's neighboring cities: Carson, Compton, Paramount, Bellflower, Artesia, Cerritos, Hawaiian Gardens, Norwalk, and Seal Beach.

Long Beach Transit is a leader in integrating new technology to improve the quality of life for the people in the communities it serves. The introduction of clean burning gasoline and electric hybrid buses is the most recent innovation to help the environment. The Agency's first order of 47 hybrid buses is now carrying passengers

The Long Beach Transit 47 E-Power hybrid buses exceed local, state and federal emissions requirements for the foreseeable future. They use up to 50 percent less fuel than diesel buses, get far better gas mileage than any other fuel option, and cost less over their lifetime than alternative-fuel buses, making them the cleanest most fuel-efficient, heavy-duty urban buses now available. The price tag for each hybrid bus is \$550,000, but the E-Power bus will cost less to maintain, operate, and fuel than existing buses. In addition, E-Power buses require no expensive infrastructure modifications as CNG and LNG buses do. They also never need to be plugged in, but recharge as they travel their routes.

Metro Services:

The Los Angeles County Metropolitan Transportation Authority (Metro) provides public transportation services in Long Beach and to other communities throughout Los Angeles County, with linkages to Orange County.

Long Beach is the southern terminus for the Los Angeles Metro Blue Line rail corridor. Blue Line trains run from Long Beach City Hall to Downtown Los Angeles. An Amtrak Thruway bus shuttle starting in San Pedro, also serves the City with stops at the Queen Mary and Downtown Long Beach, before continuing on the Union Station in Downtown Los Angeles, and eventually ending in Bakersfield. Metro currently has two regional bus lines that serve Downtown Long Beach:

- Metro 60 runs from Downtown Los Angeles to Artesia Station via Long Beach Boulevard.
- Metro 232 runs from Downtown Long Beach to LAX via Sepulveda Boulevard.

b. Green Building Standards

The City of Long Beach is a leader in sustainable building practices as well as carbon reduction, i.e., a green fleet of City vehicles as well as a plan to "Green Port Operations".

The City has a Sustainable City Commission that has worked with the City Council to effect green building practices on City buildings as well as private developments (see Appendix 4, Rehabilitation Standards).

The Community Development Department has adopted additional green building and energy efficiency measures called “*Green-Lite*” for its HOME, NSP1, and Set-Aside funded housing rehabilitation activities. The City, in its use of NSP2 funds, will perform several small to medium scale home rehabilitations that will incorporate this green standard when appropriate.

The City’s Green-Lite program, as described below, will incorporate energy efficient and sustainable materials to its NSP2 home rehabilitation in order promote and address the following energy efficient and environmental friendly concepts:

- Renewable Energy
- Energy Efficient Materials
- Water Conservation
- Healthy Homes

The City’s Green-Lite program includes the following energy efficient and sustainable materials:

- Certified Wood
- Local/Regional Materials
- Fixture Reuse
- Low-Emitting Materials
- LOW VOC Paint
- Energy Star Appliances
- Low energy Lighting
- Low-E Windows
- Energy Efficient Materials
- Light Color Roof Shingles
- Recyclable Carpet
- Drought Tolerant Planting
- Low Water Irrigation
- Construction Waste Management
- Installation of infrastructure to accommodate future photovoltaic panels.

c and d. Reuse of Cleared Sites and Deconstruction

The City in its application is not proposing to use NSP2 funds for any demolition. All NSP2 projects will occur as rehabilitation of existing housing stock. However, any NSP2 rehabilitation activity that generates construction debris will comply with the City’s Construction and Demolition Debris Recycling program (C&D) and Waste Management Plan (WMP). The City has (as described in the Office of Sustainability Division website: http://www.longbeach.gov/citymanager/citys_sustainability_programs/), in response to State-mandated waste reduction goals and as part of the City’s

commitment to sustainable development, adopted an ordinance that requires certain demolition and/or construction projects to divert at least 60% of waste either through recycling, salvage, or deconstruction.

The C&D program, which took effect on November 5, 2007, aims to encourage permit applicants to recycle all C&D materials through a refundable performance deposit. This program also encourages the use of green building techniques in new construction and promotes reuse or salvaging of recyclable materials in demolition, deconstruction, and construction projects.

A Waste Management Plan (WMP) will now accompany the building permit application for any “Covered Project”. The WMP must be completed and approved prior to permits being issued. The WMP details how the project will meet the 60% requirement.

At the conclusion of the project, a final report detailing the amount of reuse, recycling, and disposal actually generated from the project must be submitted and approved prior to the applicant receiving refund of the performance deposit. Projects that do not meet the 60% requirement may receive a partial refund in proportion to actual diversion.

e. Other Sustainable Development Practices

The City, when it is feasible in its NSP2 home rehabilitation, will require the Installation of infrastructure to accommodate future photovoltaic panels in order to encourage prospective owners to install solar panels by introducing them to other available federal, state, and private rebate programs.

6. Factor 6 – Neighborhood Transformation and Economic Opportunity

The City of Long Beach in its application certifies that all NSP activities are consistent with the following comprehensive plans:

a. City of Long Beach General Housing Element (GHE) Plan

(1).City of Long Beach (GHE)

http://www.lbds.info/planning/advance_planning/housing_element_update.asp

The Long Beach 2008-2014 Housing Element was updated and adopted in June 2009 as required by State law as a tool to guide communities in periodically considering and planning for present and future housing needs. The major funding sources for housing include: Redevelopment Set-Aside (\$20 million annually, CDBG (approximately \$1 million annually), HOME (\$5.6 million annually), and ESG – Emergency Shelter Grants (\$380,000 annually).

The Housing Element:

- Defines the special needs population, housing and neighborhood issues in Long Beach;

- Assesses the housing market and housing affordability factors;
- Assesses the City's current development regulations and practice for their impact on housing development;
- Articulates housing and neighborhood improvement goals and policies;
- Identifies how the City will meet specific Regional Housing Need Assessment (RHNA) targets for providing housing affordable to various households incomes; and,
- Establishes 2008-2014 housing development and neighborhood improvement programs with targeted objectives, timeframes, identified funding sources, and the City departments and Bureaus responsible for working together to see that the objectives are met.

(2).City's NSP2 Proposal Consistency and Effectiveness

The City's two proposed NSP2 programs will support the City in meeting the Housing Element planning goals set forth below:

- Intention of the City to guide population and economic growth in order to have an overall beneficial impact upon the City's quality of life;
- Future housing development will be focused in the Downtown and greater Downtown, along major transit corridors and within close proximity to major employment and activity centers;
- Long Beach views its existing housing stock as its greatest resource of affordable housing and will stimulate and support continued maintenance and reinvestment in that housing stock. It will take advantage of every available State and Federal program to make its housing affordable to its population, but it will not sacrifice long-term quality for short-term affordability in new or rehabilitated housing; and,
- Long Beach recognizes that strong neighborhoods are an essential building block to a citywide quality living environment, and will assist and support citizen efforts to maintain and strengthen their neighborhoods.

b. Southern California Association of Governments (SCAG) Regional Comprehensive Plan (RCP)

(1).SCAG'S RCP:

<http://www.scag.ca.gov/rcp/index.htm>

The RCP identifies voluntary best practices for local agencies to achieve a more sustainable future. The RCP presents a vision of how Southern California can balance resource conservation, economic vitality, and quality of life. The RCP identifies voluntary best practices to approach growth and infrastructure challenges in an integrated and comprehensive way. It also includes goals and outcomes to measure our progress toward a more sustainable region.

(2).City's NSP2 Proposal Consistency and Effectiveness:

NSP2 programs proposed under this application are clearly consistent with and increase the effectiveness of RCP objectives and goals in terms of creating affordable housing for area residents and balancing resource conservation, economic vitality, and quality of life. SCAG has developed a “blueprint” for urban areas by focusing on smart growth as a tool to achieve energy efficiency and carbon reduction.

The City’s two proposed NSP2 programs will support the City in meeting the planning goals set forth by the RCP below:

- Provide adequate and affordable housing for our growing population.
- Produce new housing units that will provide an economic stimulus to the region through direct investment and new jobs.
- Promote improved jobs-housing balance throughout the region.
- Locate new housing near jobs, new employment centers near housing, and both housing and jobs near transit and other transportation corridors in order to shorten commutes and allow commuting options other than single occupancy vehicles.
- Reduce regional vehicle miles traveled (VMT), resulting in reduced traffic congestion, delay, and reduced air quality impacts.
- Reduced VMT will also lead to significant infrastructure cost savings.
- Improve social equity and environmental justice through revitalization of older suburban and inner-City locations, promotion of economic development in urban core areas, and enhancement of local property and sales tax revenues.

c. City of Long Beach 2005 – 2010 Five-Year Consolidated Plan:

(1).City of Long Beach 2005 – 2010 Five-Year Consolidated Plan:

http://www.longbeach.gov/cd/neighborhood_services/reports/default.asp

NSP2 proposed programs under this application are clearly consistent with and increase the effectiveness of the four housing priorities set forth in the 2005 – 2010 Consolidated Plan:

- Provide and preserve safe, decent and affordable housing for Long Beach households with the greatest need;
- Address severe overcrowding in Long Beach neighborhoods;
- Address substandard conditions;
- Encourage owner-occupancy; and
- Enhance neighborhood stability.

SF 424 – Survey on Ensuring Equal Opportunities for Applicants

SURVEY ON ENSURING EQUAL OPPORTUNITY FOR APPLICANTS

OMB No. 1890-0014 Exp. 2/28/2009

Purpose: The Federal government is committed to ensuring that all qualified applicants, small or large, non-religious or faith-based, have an equal opportunity to compete for Federal funding. In order for us to better understand the population of applicants for Federal funds, we are asking nonprofit private organizations (not including private universities) to fill out this survey.

Upon receipt, the survey will be separated from the application. Information provided on the survey will not be considered in any way in making funding decisions and will not be included in the Federal grants database. While your help in this data collection process is greatly appreciated, completion of this survey is voluntary.

Instructions for Submitting the Survey: If you are applying using a hard copy application, please place the completed survey in an envelope labeled "Applicant Survey." Seal the envelope and include it along with your application package. If you are applying electronically, please submit this survey along with your application.

Applicant's (Organization) Name: City of Long Beach, California
Applicant's DUNS Number: 557398141
Grant Name: Neighborhood Stabilization Program 2 (NSP2) **CFDA Number:** 14.256

SF 424 Supplement

NSP2 Nonprofit Organization Qualification

Habitat for Humanity of Greater Los Angeles is a full service developer with 20 years experience in renovating and building new homes for sale to low and very-low income families. We are an affiliate of Habitat for Humanity International and have built or rehabilitated over 300 homes in Los Angeles County to date. In addition we are a mortgage lender specializing in loans the buyers earning 80% AMI and below, with a majority of buyers earning 60% and below AMI. Given that we specialize in lending to people who do not qualify for a market rate loan, we are proud that in our 20 year history our total foreclosure rate in 0.3% (one loan). We would like to partner with NSP Grantees to help implement the NSP program by utilizing the proven success of the Habitat model.

Habitat's Neighborhood Revitalization Initiative (NRI)

TRANSFORMING FORECLOSED AND REO PROPERTIES INTO AFFORDABLE HOMEOWNERSHIP OPPORTUNITIES

- Our goal is to serve families up to 50% area median income ("AMI") in Long Beach.
- We do not make a profit.
- We have deep knowledge of local housing markets that are hardest hit by the current housing crisis.
- Habitat provides homebuyers with interest free financing.
- Habitat has a proven track record of successfully administering HUD funds in compliance with program rules.

As foreclosed properties left vacant or abandoned are destabilizing communities across the country, and in record numbers in Los Angeles County, a growing inventory of real estate owned (REO) properties has increased Habitat for Humanity of Greater Los Angeles' focus on home rehabilitation. Through Habitat for Humanity's Neighborhood Revitalization Initiative (NRI), Habitat for Humanity of Greater Los Angeles will rehabilitate foreclosed and REO properties into affordable homes for purchase by low and very-low income families. Our goal is to increase the number of affordable homeownership opportunities throughout Los Angeles County and to alleviate the strain, caused by the foreclosure crisis, on cities and communities.

Management structure:

Habitat for Humanity of Greater Los Angeles has 42 employees in six key departments. The departments that would be directly involved in the implementation of NSP2 are Construction/Real Estate, Advocacy/Community Partnerships, Finance and Executive Leadership.

Key staff and their specific roles and responsibilities:

Our Construction and Real Estate Division will act as developer and General Contractor. They will oversee the acquisition of homes in target areas, develop the scope of work, timeline and budget for each property, negotiate contracts with subcontractors, oversee construction, and assist each buyer with escrow closing

including document preparation. This department also serves as property manager of each site while owned by Habitat. Key personnel in this area are Mark Van Lue, Vice President of Construction and Real Estate who is responsible for oversight of all the functions listed, Robert Dwelle, Director of Real Estate who handles acquisition and sale of the units, and Steve Sferrino, Project Director who handles scope, budget, timeline, subcontracts, and property management.

Our Advocacy and Community Partnerships Division engages skilled and unskilled volunteers to assist with the rehabilitation of homes and finds buyers and readies them for homeownership. They also serve as the point of contact with each of our partner cities. They will oversee the engagement and training of thousands of volunteers to assist with our work, ensuring they have proper training, leadership, safety briefings and equipment. This department also serves as the homebuyer liaison, conducting orientations, lender meetings, homebuyer education, and providing mentorship through the escrow process. Additionally, they will negotiate relationships with partner cities, including grant agreements, selection of target areas for revitalization under NSP, and support of key City officials and staff. Key personnel in this area are Veronica Garcia, Vice President of Advocacy and Community Partnerships who is responsible for oversight of all the functions listed, Janice Martin, Director of Programs who handles volunteer recruitment, training and engagement, and Magna Viteri Bahm, Director of Family Services who handles buyer identification, education, orientation and case management.

Our Finance Division will be primarily responsible for fiscal oversight of the grant and each individual project activity under the grant. They will oversee project budgets and expenses, establish appropriate accounts to segregate funds as needed, create financial reports and oversee audits. They serve as the liaison to the organizations finance committee who review monthly financials. They will also provide oversight of the mortgages created upon sale to qualified buyers. Key personnel in this area are Ms. Gia Stokes, Chief Financial Officer who is responsible for oversight of all the functions listed, Bill Thompson, Controller who handles monthly financial reports, audits and mortgage tracking, and Lynn Valiente, Director of Human Resources who handles hiring evaluation and human resource activity for all the employees engaged under this contract.

Our Executive Leadership, including Erin Rank, president and Chief Executive Officer, will oversee the successful completion of all activities under the NSP award. She interacts with City officials in each partner City, including the Mayor, City Council and City staff to develop partnerships. She reviews major contracts awarded under the grant. She will negotiate with lenders to provide loan products to NSP buyers, and engage major local REALTOR groups in the acquisition and sale of units. She will also play a key role in raising leveraged funds for the program. One other key person in this area is Isabel Lee, Corporate Programs Manager, who coordinates reporting, collaboration between partners, sets key project management meetings and ensures overall project timelines are being met.

Dear Sir or Madam:

This is in response to your request of October 14, 2005, regarding your organization's tax-exempt status.

Your organization is exempt under section 501(c)(3) of the Code because it is included in a group ruling issued to Habitat for Humanity International Inc., located in Americus, Georgia.

Our records indicate that contributions to your organization are deductible under section 170 of the Code, and that you are qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Internal Revenue Code.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

Sincerely,

Janna K. Skufca, Director, TE/GE

HFH of Greater Los Angeles
17700 South Figueroa St
Gardena CA 90248

Dear HFH of Greater Los Angeles,

This letter will confirm that HFH of Greater Los Angeles is an affiliate in good standing with Habitat for Humanity International and continues to be considered a subordinate under the group tax exemption umbrella of Habitat for Humanity International, Inc. ("HFHI") under section 501(c)(3) of the Internal Revenue Code.

The group exemption number assigned to HFHI by the IRS is 8545. This number may be provided to prospective donors, foundations and other grant organizations as they request it and is required on certain IRS forms.

In partnership,

Consortium Agreement

CONSORTIUM AGREEMENT

This Consortium Agreement (this "Agreement") is made and entered into this 9th day of July, 2009, by and between the CITY OF LONG BEACH, a California municipal corporation, and HABITAT FOR HUMANITY OF GREATER LOS ANGELES, a California nonprofit corporation (collectively, the "Consortium Members").

WITNESSETH

WHEREAS, the Consortium Members desire to enter into their application for Neighborhood Stabilization Program 2 ("NSP2") funds;

WHEREAS, the Consortium Members are ready, willing, and able to enter into a consortium evidenced by this Agreement (the "Consortium");

WHEREAS, the Consortium Members desire to cooperatively implement program activities as described in their application for NSP2 funds; and

WHEREAS, the Consortium Members are ready, willing, and able to implement such activities;

NOW, THEREFORE, in consideration of the promises, and the mutual covenants and obligations herein contained, the parties agree as follows:

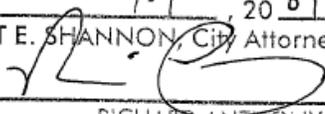

1. **BASIC OBJECTIVES**: The Consortium Members agree to work cooperatively in implementing program activities as described in their application for NSP2 funds in connection with the Notice of Funds Availability for NSP2 issued by the Department of Housing and Urban Development ("HUD") on May 4, 2009. A copy of the Consortium's application for NSP2 funds is attached hereto as **Exhibit A**.
2. **TIME OF PERFORMANCE**: This Agreement shall begin on the date executed by the parties and end on December 1, 2009, unless such time is extended by written agreement of the parties, executed in the same manner as this Agreement. The term of this Agreement and the provisions herein shall automatically be extended to cover any additional time period during which any Consortium Member remains in control of NSP2 funds or other NSP2 assets, including program income, resulting from the Consortium's NSP2 program.
3. **APPOINTMENT OF LEAD MEMBER**: The Consortium Members hereby appoint the City of Long Beach to serve as lead member of the Consortium ("Lead Member").
4. **RESPONSIBILITIES OF LEAD MEMBER**: The Lead Member assumes the responsibility of acting in a representative capacity for all Consortium Members as required by HUD in its Notice of Funds Availability for NSP2. The Lead Member further assumes responsibility for ensuring the Consortium's NSP2 program is carried out in compliance with all statutory and regulatory requirements applying to the use of NSP2 funds and in substantial compliance with the Consortium's NSP2 application.

- 5. **MAINTENANCE AND EXAMINATION OF RECORDS:** Each Consortium Member assumes the responsibility of maintaining such records as are required by HUD and as are necessary for the Lead Member to ensure compliance of the Consortium's NSP2 program with all applicable requirements and with the Consortium's NSP2 application. The Consortium Members agree that any duly authorized representative of the Lead member shall, until the expiration of five (5) years after the expiration of this Agreement, or such longer period as may be required due to an audit finding, upon reasonable notice, have access to and the right to examine any books, documents, papers and records of the Consortium Members, involving transactions related to the Consortium's NSP2 program.

- 6. **FUNDING AGREEMENTS:** Provided that the Consortium's NSP2 application is deemed fundable by HUD and the governing boards of each Consortium Member formally accept NSP2 funds and authorize execution of documents in connection therewith, Consortium Members hereby agree to execute a Consortium Funding Agreement, as required by the Notice of Funding Availability for NSP2 funds, no later than December 1, 2009.

- 7. **STATES, INDIAN TRIBES, AND UNITS OF GENERAL LOCAL GOVERNMENT:** Any consortium Member that is a state, and Indian tribe, or a unit of general local government is hereby authorized to assume all responsibility for environmental review, decision-making, and action for proposed projects within its jurisdiction on behalf of the Consortium in accordance with the requirements of 24 CFR Part 58.

IN WITNESS WHEREOF, the parties hereto enter into this Agreement.

HUD 2880, Applicant/ Recipient Disclosure/ Update Report

Applicant/Recipient Disclosure/Update Report

U.S. Department of Housing and Urban Development

OMB Approval No. 2510-0011 (exp. 8/31/2009)

Instructions. (See Public Reporting Statement and Privacy Act Statement and detailed instructions on page 2.)

Applicant/Recipient Information Indicate whether this is an Initial Report or an Update Report

| | |
|--|---|
| 1. Applicant/Recipient Name, Address, and Phone (include area code): City of Long Beach, Community Development Department 333 W Ocean Blvd, Long Beach, CA 90802 562/570-7403 | 2. Social Security Number or Employer ID Number: 956-00-0733 |
| 3. HUD Program Name Neighborhood Stabilization Program 2 (NSP2) | 4. Amount of HUD Assistance Requested/Received \$22,249,980.00 |
| 5. State the name and location (street address, City and State) of the project or activity: City of Long Beach, California - Project Qualified Areas | |

Part I Threshold Determinations

| | |
|--|--|
| 1. Are you applying for assistance for a specific project or activity? These terms do not include formula grants, such as public housing operating subsidy or CDBG block grants. (For further information see 24 CFR Sec. 4.3). <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No | 2. Have you received or do you expect to receive assistance within the jurisdiction of the Department (HUD) , involving the project or activity in this application, in excess of \$200,000 during this fiscal year (Oct. 1 - Sep. 30)? For further information, see 24 CFR Sec. 4.9 <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No. |
|--|--|

If you answered "No" to either question 1 or 2, **Stop!** You do not need to complete the remainder of this form. **However,** you must sign the certification at the end of the report.

Part II Other Government Assistance Provided or Requested / Expected Sources and Use of Funds.

Such assistance includes, but is not limited to, any grant, loan, subsidy, guarantee, insurance, payment, credit, or tax benefit.

| Department/State/Local Agency Name and Address | Type of Assistance | Amount Requested/Provided | Expected Uses of the Funds |
|--|--------------------|---------------------------|----------------------------|
| | | | |

(Note: Use Additional pages if necessary.)

Part III Interested Parties. You must disclose:

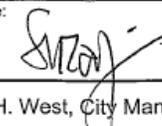

- All developers, contractors, or consultants involved in the application for the assistance or in the planning, development, or implementation of the project or activity and
- any other person who has a financial interest in the project or activity for which the assistance is sought that exceeds \$50,000 or 10 percent of the assistance (whichever is lower).

| Alphabetical list of all persons with a reportable financial interest in the project or activity (For individuals, give the last name first) | Social Security No. or Employee ID No. | Type of Participation in Project/Activity | Financial Interest in Project/Activity (\$ and %) |
|--|--|---|---|
| | | | |

(Note: Use Additional pages if necessary.)

Certification

Warning: If you knowingly make a false statement on this form, you may be subject to civil or criminal penalties under Section 1001 of Title 18 of the United States Code. In addition, any person who knowingly and materially violates any required disclosures of information, including intentional non-disclosure, is subject to civil money penalty not to exceed \$10,000 for each violation. I certify that this information is true and complete.

| 573600 | 2330 | 16 |
| 574500 | 2356 | 22 |
| 575101 | 1527 | 37 |
| 575202 | 1261 | 46 |
| 575803 | 1301 | 15 |
| 575901 | 1401 | 41 |
| 576100 | 2783 | 147 |
| 576401 | 1316 | 31 |
| 577603 | 3944 | 43 |
| Totals | 73194 | 1359 |

Data source for the above vacancy by CT was compiled from "HUD Aggregated USPS Administrative Data On Address Vacancies".

<http://www.huduser.org/DATASETS/usps.html>

Formula

$$\frac{(1.5 (\text{sum total of vacant properties proposed to be addressed through acquisition and rehab}) + (\text{sum total of vacant properties proposed to be addressed through demolition}))}{\text{Sum total of all vacant residential properties in target area}}$$

Computation

$$\frac{(1.5(111)+(0))}{1359} = 166.5:1359$$

Let PA = Properties to be addressed
Let VR = All Vacant Residential units in NSP2 areas
 $PA/VR = 166.5/1359 = 1/x$
 $x\{166.5/1359\} = x\{1/x\}$
 $166.5x/1359 = 1$
 $166.5x = 1359$
 $x = 1359/166.5$
 $x = 8.16$
166.5:1359 can be expressed as 1:8.16

According to the ratio calculation above, the City, through its proposed NSP2 acquisition and rehabilitation program, will remove one foreclosed and vacant property (blighted home) for every 8 vacant residential properties (both foreclosed and non-foreclosed) in the identified areas, in order to stabilize the targeted areas.

4. Definitions

Definition of “Blighted Structure” In Context of State or Local Law

The California Health and Safety Code Section 33031 describes physical conditions that cause blight related to structures as:

33031 (a)

(1) Buildings in which it is unsafe or unhealthy for persons to live or work. These conditions may be caused by serious building code violations, serious dilapidation and deterioration caused by long-term neglect, construction that is vulnerable to serious damage from seismic or geologic hazards, and faulty or inadequate water or sewer utilities.

(2) Conditions that prevent or substantially hinder the viable use or capacity of buildings or lots. These conditions may be caused by buildings of substandard, defective, or obsolete design or construction given the present general plan, zoning, or other development standards.

33031 (b)

(3) Abnormally high business vacancies, abnormally low lease rates, or an abnormally high number of abandoned buildings.

(7) A high crime rate that constitutes a serious threat to the public safety and welfare.

The Long Beach Municipal Code references blighted structures to buildings or conditions, which will impair or destroy the quality of life, to the detriment of the City, through the deterioration of property and business values for adjacent properties. Long Beach Municipal Code references to the source, condition, prevention, elimination or spread of “Blight” appear in Sections 18.21.010, 18.21.020, 18.20.030 for the monitoring of vacant buildings; Section 8.56 for the abatement of graffiti on buildings; Section 10.46.010 for the abatement of abandoned and wrecked vehicles; Section 21.10.020 for the protection and preservation of the City’s cultural heritage; and Section 21.27.050 as a reason for the abandonment or revocation of a property’s non-conforming rights.

In addition, the overall “spirit” of all of the regulatory codes used in Code Enforcement are designed and written, so as to provide standards, which in their application and enforcement will eliminate blighted structures and conditions in whatever capacity it may appear.

Definition of “Affordable Rents”

The generally accepted affordability standard or "Affordable Rent" is rent that does not exceed 30% of the household’s income. The CDBG program does not mandate the exact rent to be applied to NSP properties. Jurisdictions are, however, allowed to determine the rent standard to be applied and may adopt rent limits similar to

those used for the HOME Program. Whichever standard is approved, the rents must be truly affordable to low- and moderate-income households.

Section 50053 of the California Health and Safety Code, defines "affordable rents" as rents that do not exceed a certain percentage of the area median income, by income category, adjusted for family size appropriate for the unit.

HOME Affordable Rents:

Maximum HOME rent for a low-income household renting a 3-bedroom unit in the Long Beach area is \$1,247 per month. For a very low-income household the maximum HOME rent is \$985 per month. Note that since HOME funds can not be used for moderate-income households, HOME does not publish an affordable rent standard for this income category.

A comparison of the Health and Safety Code and HOME rents indicates that the Health and Safety Code rents would provide a more affordable rent. However, the HOME rents, although still considered affordable, would provide a higher rent to the property owner, which may be needed to make the project work financially.

TABLE A
TENANT INCOME LIMITS
HUD HOME PROGRAM INCOME LIMITS
EFFECTIVE AS OF April 27, 2009

| HOUSEHOLD SIZE | 30% OF MEDIAN | 50% OF MEDIAN | 60% OF MEDIAN | 80% OF MEDIAN |
|----------------|---------------|---------------|---------------|---------------|
| 1 PERSON | \$16,650.00 | \$27,750.00 | \$33,300.00 | \$44,400.00 |
| 2 PERSONS | \$19,050.00 | \$31,700.00 | \$38,040.00 | \$50,750.00 |
| 3 PERSONS | \$21,400.00 | \$35,700.00 | \$42,840.00 | \$57,100.00 |
| 4 PERSONS | \$23,800.00 | \$39,650.00 | \$47,580.00 | \$63,450.00 |
| 5 PERSONS | \$25,700.00 | \$42,800.00 | \$51,360.00 | \$68,550.00 |
| 6 PERSONS | \$27,600.00 | \$46,000.00 | \$55,200.00 | \$73,600.00 |
| 7 PERSONS | \$29,500.00 | \$49,150.00 | \$58,980.00 | \$78,700.00 |
| 8 PERSONS | \$31,400.00 | \$52,350.00 | \$62,820.00 | \$83,750.00 |

IT IS THE PROPERTY OWNER'S RESPONSIBILITY TO DETERMINE THE INCOME ELIGIBILITY OF TENANT HOUSEHOLDS AS FOLLOWS:

TENANT HOUSEHOLD INCOME DETERMINATIONS AT INITIAL OCCUPANCY, & EVERY 6TH YEAR OF THE AFFORDABILITY PERIOD: Income eligibility determinations MUST be carried out using the 24 CFR Part 5 Definition of Annual (Gross) Income. Use the attached paperwork entitled "Calculation Method of 24CFR Part 5" From HUD publication entitled "Technical Guide for Determining Income and Allowances for the HOME Program" HUD-1780-CPD, published June 1999.

TENANT HOUSHOLD INCOME DETERMINATIONS DURING THE PERIOD OF AFFORDABILITY OTHER THAN AT INITIAL OCCUPANCY OR EVERY 6TH YEAR: Annual recertification of income of in-place tenant households MUST be done. The property owner may conduct annual recertification of income of in-place tenant households by obtaining completed, signed and dated "Recertification of Annual Income by Tenant Household" forms from the tenant households. These blank forms are provided by the City.

IF AFTER INITIAL OCCUPANCY A TENANT HOUSEHOLD'S INCOME RISES ABOVE 80% OF AREA MEDIAN, AND THUS THEY NO LONGER QUALIFY AS LOW-INCOME: Per 24 CFR 92.252(i)2: "Tenants who no longer qualify as low-income families must pay as rent the lesser of the amount payable by the tenant under State or local law or 30 percent of the household's adjusted income, except that tenants of HOME-assisted units that have been allocated low-income housing tax credits by a housing credit agency pursuant to section 42 of the Internal Revenue Code of 1986 (26 U.S.C. 42) must pay rent governed by section 42. In addition, in projects in which the HOME units are designated as floating pursuant to paragraph (j), tenants who no longer qualify as low-income are not required to pay as rent an amount that exceeds the market rent for comparable, unassisted units in the neighborhood." The property owner MUST use the calculation method of 24CFR5.611 to calculate 30% of adjusted income in order to determine rent for over-income tenants who were income eligible at the time of initial occupancy. Use the attached paperwork entitled "Calculation Method of 24CFR5.611" from HUD publication entitled "Technical Guide for Determining Income and Allowances for the HOME Program" HUD-1780-CPD, published June 1999.

THE PROPERTY OWNER MUST RETAIN ALL RECORDS OF TENANT INCOME VERIFICATIONS, RENTS, INSPECTIONS, AND OTHER HOME PROGRAM REQUIRED PAPERWORK, UNTIL FIVE YEARS AFTER THE AFFORDABILITY PERIOD TERMINATES.

TABLE B
MAXIMUM RENT INCLUDING TENANT-PAID UTILITY ALLOWANCES

HUD HOME PROGRAM RENT LIMITS EFFECTIVE AS OF APRIL 27, 2009

| UNIT SIZE | 0 BEDROOM | 1 BEDROOM | 2 BEDROOM | 3 BEDROOM | 4 BEDROOM | 5 BEDROOM |
|--|--------------|--------------|--------------|--------------|--------------|--------------|
| <p align="center"><u>“LOW” HOME RENTS</u></p> <p>20% OF UNITS MUST BE AT OR BELOW, RENTED TO HOUSEHOLDS EARNING 50% OR LESS OF AREA MEDIAN INCOME</p> | \$693 | \$743 | \$892 | \$1,030 | \$1,150 | \$1,268 |
| <p align="center"><u>“HIGH” HOME RENTS</u></p> <p>80% OF UNITS MUST BE AT OR BELOW</p> | \$883 | \$947 | \$1,138 | \$1,306 | \$1,438 | \$1,567 |

RENTS MUST BE REDUCED IN ACCORDANCE WITH TABLE “C” TO ACCOMMODATE UTILITIES AND OTHER BASIC SERVICES THAT TENANTS MAY BE REQUIRED TO PAY. EXAMPLE: Unit #1 is a 2-bedroom “HIGH” HOME rent unit. Per Table “B” above, the maximum rent including tenant-paid utility allowances is \$1,138. The tenant household is paying for heating by natural gas, cooking by natural gas, basic electricity, water heating by natural gas, and provided their own refrigerator. The sum total of these tenant-paid utility allowances per Table “C” is \$91. Thus, the maximum \$ amount of rent the property owner may receive for unit #1 (from ALL sources, including amounts paid by the tenant, rental assistance program, etc.) is \$901. Calculation is as follows: \$1,138 - \$91 = \$1,047.

In properties with five or more HOME assisted units 20% of the units **MUST** be rented at or below the “LOW” HOME rent to households earning 50% or less of area median income, and 80% of the units **MUST** be rented at or below the “HIGH” HOME rent. In properties with less than five HOME-assisted units all of the units may be rented at or below the “HIGH” HOME rent.

TABLE C

**MONTHLY ALLOWANCES FOR TENANT-PAID UTILITIES
(Established by the Housing Authority of the City of Long Beach)**

2007

| Utility or Service | 0 Bedroom | 1 Bedroom | 2 Bedroom | 3 Bedroom | 4 Bedroom | 5 Bedroom |
|----------------------------|-----------|-----------|-----------|-----------|-----------|-----------|
| Heating | | | | | | |
| Natural Gas | \$17 | \$20 | \$26 | \$34 | \$40 | \$47 |

| Refrigerator | \$5 | \$5 | \$5 | \$5 | \$5 | \$5 |

Description of Housing Rehabilitation Standards

Housing Rehabilitation Standards currently in use by the City of Long Beach for all Federal and State housing rehabilitation programs, and applicable to all NSP assisted activities will include:

- Current Uniform Housing Code, which provides complete requirements affecting conservation and rehabilitation of housing and which are compatible with the Uniform Building Code.
- The 2007 Edition of California Building Code, which incorporates the California Electrical Code, California Plumbing Code, and California Mechanical Code.

- City of Long Beach Municipal Code Title 18, Sections 18.24 through 18.40 which describes Electrical, Plumbing and Mechanical codes, and includes Prohibited Uses and Maintenance, which in some instances are more stringent than those of the California Building Code.

Staff has carefully inspected, prepared detailed scopes of work, and monitored 486 single-family and multi-family residential rehabilitation units within the past 24 months, ensuring compliance with all applicable code described above.

- City of Long Beach “Green **Lite**” Building Policy, which utilizes elements of the LEED Green Building Rating System (see checklist below) when replacing building components within the scope of project rehabilitation.

The City’s “Green **Lite**” Building Policy primarily consists of replacing damaged or deteriorated components or mechanical systems in connection with project rehabilitation with: FSC wood products; Energy Star appliances; Low Energy Lighting; Low VOC Paint; Low-E Windows; Recyclable Carpet; Drought Tolerant Planting and Irrigation; and Construction Waste Management.

- Mitigation Lead-Based Paint Hazards in all residential property built prior to 1978.

The City of Long Beach currently has three staff members certified by the State of California Department of Public Health to perform lead hazard evaluations in residential and public buildings as an Inspector/Assessor. Within the past 24 months, staff has conducted over 76 lead inspections for State and Federal rehabilitation, and down payment assistance projects

Other Green Building Checklist that are currently implemented, whenever applicable, by the City that will be considered in NSP2 Projects are as follows:

Building Checklist

Building Site

- Protect top soil and minimize disruption of existing plants and trees
- Recycle job site construction waste and deconstruct, not demolish, when possible
- Use recycled content aggregate

Foundation

- Design and build structural pest control

Landscaping

- Construct resource-efficient landscapes using drought-tolerant and native species only
- Use fire-safe landscaping techniques
- Minimize turf areas

- ❑ Plant shade trees using drought-tolerant and native species only
- ❑ Install high-efficiency irrigation systems
- ❑ Incorporate 2 inches of compost in top 6 to 12 inches of soil
- ❑ Mulch all planting beds to greater of 2 inches of local water ordinance
- ❑ Reduce light pollution by shielding fixtures and directing light downwards

Structural Frame and Building Envelope

- ❑ Reduce pollution entering home from garage
- ❑ Energy heels on trusses
- ❑ Overhangs and gutters
- ❑ Weather stripping around windows and doors

Exterior Finish

- ❑ Use recycled-content (engineered) for siding and FSC-Certified for wood decking
- ❑ Install rain screen wall system to reduce rainwater intrusion
- ❑ Use durable, non-combustible materials
- ❑ Roofing materials

Insulation

- ❑ 75% recycled content and upgrade insulation using low-emitting materials

Finishes

- ❑ Design entryways to reduce tracked-in contaminants
- ❑ Use low-VOC or no-VOC materials
- ❑ Environmentally-preferred materials for interior finishes

Heating, Ventilation, Air Conditioning (HVAC)

- ❑ Install sealed combustion units
- ❑ Zoned, hydronic radiant heating
- ❑ High efficiency air conditioning
- ❑ Efficient duct work
- ❑ ENERGY STAR High efficiency HVAC filter
- ❑ Remove wood-burning fireplaces
- ❑ Effective exhaust systems
- ❑ Mechanical ventilation system for cooling
- ❑ Mechanical fresh air ventilation system
- ❑ Carbon monoxide alarms

Renewable Energy

- ❑ Pre-plumb for solar hot water heating and/or install solar hot water heating system
- ❑ Install wiring conduit for future photovoltaic installation (“Solar-ready Roof”)

Plumbing

- ❑ Efficient hot water distribution
- ❑ High efficiency toilets

Flooring

- ❑ Use environmentally preferred flooring material
- ❑ Thermal mass floors

Appliances and Lighting

- ❑ ENERGY STAR water and energy efficient dishwasher
- ❑ ENERGY STAR clothes washing machine
- ❑ ENERGY STAR refrigerator
- ❑ Install built-in recycling center and compost center

Other

- ❑ Green Home Guide for all new residents (pamphlet or small guidebook):

Re: Firm Commitment of Contributions in Support of NSP2 Application

Dear Dennis,

Habitat for Humanity of Greater Los Angeles (HFH GLA) is pleased to provide this letter of commitment to the City of Long Beach in support of your application for Neighborhood Stabilization Program 2 (NSP2) funding under the American Recovery and Reinvestment Act of 2009.

We hereby confirm our firm commitment to provide private contributions of materials in support of the housing rehabilitation and redevelopment activities targeted at those earning 50% of AMI or less specified in your NSP2 funding application as follows:

Habitat for Humanity of Greater Los Angeles will provide \$9,000 in contributed materials for each unit that is purchased and rehabilitated. Materials include paint, energy efficient appliances, lumber, solar panels and/or sustainable energy efficient products. Based upon your projection of HFH GLA acquiring and rehabilitating twenty five units, we estimate that the value of our donated materials for this project would be approximately \$225,000.

As you know, HFH GLA has a long standing history of providing affordable homeownership opportunities in the City of Long Beach and we have found our work with the City to be an effective and rewarding way to serve low income families in your community. It would be our great pleasure to participate in the HUD NSP2 funding application, pursuant to the HUD's Notice of Fund Availability, Docket No. FR-5321-N-01, dated May 4, 2009, and specifically in support of the Rating Factor 4a—leverage section of your application.

I am duly authorized to execute this letter of commitment on behalf of the organization.

Sincerely,

A handwritten signature in blue ink that reads "Erin Rank".

CITY MANAGER

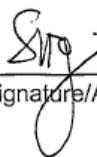

Neighborhood Stabilization Program2 (NSP2) Application Firm Commitment of Contributions

The City of Long Beach, as required by the Notice of Fund Availability for NSP2 under the American Recovery and Reinvestment Act of 2009, hereby commits to provide the following resources and specific amounts, as shown in the tables below, to invest in its proposed NSP2 programs:

| Resource | Amount/Form | Use | Average Amount Per Unit |
|--|---|---|--|
| State- CalHome | \$1,500,000 Differed Payment Loan | To augment NSP2 funds for rehabilitation of 60 foreclosed homes | \$25,000 |
| Estimated borrower downpayment contribution | \$225,000 | Financing – excluding downpayment assistance | \$2,000 per unit |
| Private nonprofit* | \$225,000 in-kind | To augment NSP2 funds for rehabilitation of 25 foreclosed homes | \$9,000 in contributed materials |

* As evidenced by firm commitment letter from Habitat

I am duly authorized to execute this letter of commitment on behalf of City of Long Beach.

6. Code of Conduct

CODE OF ETHICS

On February 6, 2003, the City Council of the City of Long Beach adopted a Code of Ethics, which applies to City employees, officers and commission members. This Code requires that all employees, officers and commission members shall pledge:

- To place the best interests of the City above all other interests.
- To uphold all laws, regulations and policies.
- To take no action for the purpose of benefiting the official or employee personally.
- To make every effort to avoid a conflict of interest.
- To avoid disclosure of confidential information obtained in the performance of his or her duties or in his or her official capacity.
- To exercise prudence and good judgment at all times.
- To be fair, impartial, and unbiased in the decision-making process.
- To treat each other and the public with respect.

7. Certifications

LOCAL GOVERNMENT CERTIFICATION

Neighborhood Stabilization Program 2 (NSP2)

State and Unit of Local Government Certifications

1. **Affirmatively furthering fair housing.** The applicant certifies that it will affirmatively further fair housing, which means that it will conduct an analysis to identify impediments to fair housing choice within the jurisdiction, take appropriate actions to overcome the effects of any impediments identified through that analysis, and maintain records reflecting the analysis and actions in this regard.
2. **Anti-displacement and relocation plan.** The applicant certifies that it has in effect and is following a residential anti-displacement and relocation assistance plan.
3. **Anti-lobbying.** The applicant must submit a certification with regard to compliance with restrictions on lobbying required by 24 CFR part 87, together with disclosure forms, if required by that part.
4. **Authority of applicant.** The applicant certifies that it possesses the legal authority to carry out the programs for which it is seeking funding, in accordance with applicable HUD regulations and other program requirements.
5. **Acquisition and relocation.** The applicant certifies that it will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (42 U.S.C. 4601), and implementing regulations at 49 CFR part 24, except as those provisions are modified by the notice for the NSP2 program published by HUD.
6. **Section 3.** The applicant certifies that it will comply with section 3 of the Housing and Urban Development Act of 1968 (12 U.S.C. 1701u), and implementing regulations at 24 CFR part 135.

7. **Citizen participation.** The applicant certifies that it is carrying out citizen participation in accordance with NSP2 requirements.

8. **Use of funds.** The jurisdiction certifies that it will comply with Title III of Division B of the Housing and Economic Recovery Act of 2008, as modified by the American Reinvestment and Recovery Act by spending 50 percent of its grant funds within 2 years, and spending 100 percent within 3 years, of receipt of the grant.

9. **The applicant certifies:**

a. that all of the NSP2 funds made available to it will be used with respect to individuals and families whose incomes do not exceed 120 percent of area median income; and

b. The applicant will not attempt to recover any capital costs of public improvements assisted with CDBG funds, including Section 108 loan guaranteed funds, by assessing any amount against properties owned and occupied by persons of low-and moderate-income, including any fee charged or assessment made as a condition of obtaining access to such public improvements. However, if NSP funds are used to pay the proportion of a fee or assessment attributable to the capital costs of public improvements (assisted in part with NSP funds) financed from other revenue sources, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than CDBG funds. In addition, with respect to properties owned and occupied by moderate-income (but not low-income) families, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than NSP funds if the jurisdiction certifies that it lacks NSP or CDBG funds to cover the assessment.

10. **Excessive force.** The applicant, if an applicable governmental entity, certifies that it has adopted an in enforcing:

a. A policy prohibiting the use of excessive force by law enforcement agencies within its jurisdiction against any individuals engaged in nonviolence civil rights demonstrations; and

b. A policy of enforcing applicable state and local laws against physically barring entrance to, or exit from, a facility or location that is the subject of such nonviolent civil rights demonstrations within its jurisdiction.

11. **Compliance with anti-discrimination laws.** The applicant certifies that the NSP grant will be conducted and administered in conformity with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d), the Fair Housing Act (42 U.S.C. 3601-3619), and implementing regulations.

12. **Compliance with lead-based paint procedures.** The applicant certifies that its activities concerning lead-based paint will comply with the requirements of 24 CFR part 35, subparts A, B, J, K, and R.

13. **Compliance with laws.** The applicant certifies that it will comply with applicable laws.

PUBLIC NOTICE

Notice is hereby given that the City of Long Beach is proposing to apply for funding from the Neighborhood Stabilization Program 2 (NSP-2) under the American Recovery and Reinvestment Act (ARRA), 2009. This is a competitive grant program and the purpose of these funds is to assist in the redevelopment of abandoned and foreclosed homes. The application will be submitted to the United States Department of Housing and Urban Development (HUD) by the submission deadline of July 17, 2009.

The City proposes to apply for \$22,249,980 in NSP-2 funding to be utilized in the following NSP-2 eligible categories:

- Establish financing mechanisms to purchase and redevelop foreclosed upon homes and residential properties, including such mechanism as soft-second, loan loss reserve, and shared-equity loans for low- and moderate-income homebuyers.
- Purchase and rehabilitate homes and residential properties that have been abandoned or foreclosed upon, in order to sell, rent, or redevelop such homes and properties.

Draft copies of the application will be available to the public on July 3, 2009, for a 10-day comment period ending July 13, 2009, at the Neighborhood Resources Center, 425 Atlantic Avenue, Long Beach, CA 90802 and Main Public Library, 101 Pacific Avenue, Long Beach, CA 90802. In addition, a copy can be obtained by contacting Alem S. Hagos, CDBG Coordinator at 562/570-7403 or can be downloaded from or viewed on the Neighborhood Services web page: WWW.longbeach.gov/cd/neighborhood_services

After reviewing the City's application, please send your written comments to Neighborhood Services Bureau, 444 W Ocean Blvd., Suite 1700, Long Beach, CA 90802, Attention: Alem S. Hagos, CDBG Coordinator.

Pub July 2, 2009(11)PT(158993/746588)

C.L-07-2066 Legal Affidavit

AVISO PUBLICO

Esta notificación sirve para informar al público sobre la intención de la Ciudad de Long Beach de aplicar para una concesión de fondos disponible a través del Programa de Estabilización de Vecindarios 2 (NSP-2) bajo la Ley Americana de Recuperación y Re-inversión (ARRA) del 2009. Esta es una concesión competitiva del cual propósito es de asistir en renovar viviendas abandonadas y en estado de embargo (foreclosure). La Ciudad entregara una aplicación para recibir fondos bajo el programa NSP-2 al Departamento de Viviendas y Desarrollo Urbano de los Estados Unidos (HUD) antes de la fecha de plazo, 17 de Julio, 2009.

La Ciudad aplicara para \$22,249,980 en fondos del programa NSP-2 para ser utilizado en las siguientes categorías elegibles:

Establecer un mecanismo financiero para comprar y renovar viviendas embargadas y propiedades residenciales incluyendo prestamos secundarios con intereses diferidos, reserva para perdida de prestamos y prestamos de valor compartido para el beneficio de compradores de vivienda de ingresos bajos y moderados.

Compra y rehabilitación de viviendas y propiedades residenciales cuales han sido abandonadas y embargadas para el propósito de rentar, vender y renovar tales propiedades y viviendas.

Copias de la aplicación serán disponibles al publico el 3 de Julio del 2009, para un periodo de comentario cual finalizara el 13 de Julio del 2009. La aplicación será disponible en el Centro de Recursos al Vecindario, 425 Atlantic Avenue, Long Beach, California 90802, y en la Biblioteca Principal, 101 Pacific Avenue, Long Beach, California 90802. Adicionalmente, una copia puede ser obtenida al contactar a Alem S. Hagos, Coordinador de CDBG al (562) 570-7403 o bajada por el internet en la pagina

http://www.longbeach.gov/cd/neighborhood_services/default.asp

Después de leer la aplicación de la Ciudad, por favor mande sus comentarios a el Buro de Servicios al Vecindario, 444 West Ocean Blvd., Suite 1700, Long Beach, California 90802, Atención: Alem S. Hagos, Coordinador de CDBG.
